**EMDAT DELIVERS RECORD QUARTER AND EXPANDS ITS BUSINESS LINE
WITH NEW PARTNERSHIP**

*2012 Brings Record Number of Contract Signings and Partnership with Reseller of Mission Critical
Voice and Data Solutions*

Fitchburg, Wis. (April 25, 2012) – [Emdat Inc.](#), a leading provider of clinical documentation software designed to bridge the gap between Electronic Health Record (EHR) systems and traditional dictation, announced today a record quarter for new contract signings. The quarter's new partnerships include Nelson Systems, a national reseller of technical services and support, as well as multiple medical facilities and regional and government-based medical transcription service providers throughout the United States.

[Nelson Systems, Inc.](#) specializes in technical services that support mission critical voice and data applications, including hospitals, law offices, call centers and emergency settings. Nelson Systems will be reselling a host of Emdat applications, including the mobile app Emdat Mobile, which maximize clinician efficiency, increase documentation accuracy and help their healthcare clients provide the best care possible.

Emdat Mobile allows clinicians to enjoy the benefits of an EHR system and comply with meaningful use guidelines without suffering a drop in productivity. Clinicians can dictate and view their schedule directly from their mobile device. Documents can be reviewed, edited, electronically signed and routed on their Apple iOS or Android mobile devices without interrupting face time with patients. EHRs are automatically populated with data derived from the transcription.

-more-

“Nelson Systems is very excited to add the Emdat platform to our services for the healthcare market that we have been working with for the last twenty years. Emdat provides a limitless solution that enables medical professionals to better treat patients while saving time and money,” said Nelson Systems CEO, Doug Nelson, Sr. “We knew we wanted to be aligned with Emdat and its forward-looking vision to expand our footprint.”

“Emdat is pleased to announce this new relationship with Nelson Systems in addition to our new partnerships with a number of medical transcription service organizations. The expansion of our distribution channels allows us to bring our suite of applications and its efficient workflow, EHR integration and cost-saving benefits to more medical facilities and health care providers,” states Emdat CEO Randy Olver.

ABOUT EMDAT

[Emdat, Inc.](#) provides medical facilities, physicians and documentation service providers with a web-based suite of applications that maximizes clinicians' productivity and accuracy when documenting patient encounters. Emdat's unified platform streamlines the documentation workflow and populates EHRs and other clinical repositories with data derived from the timesaving process of dictation. Emdat's exclusive [Qualified Text](#) feature increases efficiency while reducing documentation costs. Headquartered in Fitchburg, WI, Emdat works with more than 3,500 medical facilities throughout the United States and a network of hundreds of documentation service providers worldwide. More information on Emdat is available at www.emdat.com.

ABOUT NELSON SYSTEMS, INC.

Based in Springfield, Illinois, Nelson Systems, Inc. specializes in technical services that support mission critical applications including hospitals, law offices, call centers, and emergency settings. Centralized call tracking, guaranteed response time, and 24-hour service have been standards at NSI since 1989.
