

Webconferencing-Test Launches Compare Tools Pro

New Compare Tools Pro Version Provides Unmatched Database of More Than 30 Webconferencing and Online Meeting Services for Fast Comparison and Informed, Unbiased Reviews

Rochester, NY and Frankfurt am Main, Germany, May 2, 2012 – Webconferencing-Test.com today announced the launch of Compare Tools Pro, a comprehensive and on-demand report product that delivers detailed comparisons of online meeting solutions. The new Compare Tools Pro service consists of vendor-independent reviews and rankings ranging from the most popular and widely adopted webconferencing solutions to niche and specialty online meeting software companies.

Compare Tools Pro gives users immediate value with:

- Immediate access to compare more than 30 web conferencing solutions
- Comprehensive and objective analysis on the basis of over 80 functions and criteria
- Personalized PDF report that provides a thorough review of each tool and feature matrix

Starting at \$19.00 for a comparison of four products, additional products can be added to each report for \$4 each. The service is an excellent basis for [evaluating webconferencing](#) and online meeting tools software.

“Since launching Webconferencing-Test.com six years ago, we have been passionate about developing the most robust and comprehensive comparison portal to help people determine what webconferencing solution is best for their unique needs,” said Robert Harnischmacher, the managing director at Publicare Marketing Communications and publisher of Webconferencing-Test.com. “Compare Tools Pro is an on-demand report filled with comprehensive, easy to understand, objective information to help companies quickly analyze possible webconferencing solutions at an incredible value. There is no need to create multiple test and trial accounts to review solutions or time pouring over information across various websites, The Compare Tools Pro report helps companies narrow down which solutions will fit their infrastructure and situational needs.”

The power and complexity of online meeting tools continues to increase and new features and capabilities are changing all of the time. Companies that are in the process of reviewing webconferencing services can review a [Free Evaluation Guide](#) that explains which criteria are important when selecting web conferencing software.

Additionally, Webconferencing-Test also offers [Compare Tools Free](#), a complimentary service that is designed to deliver an initial overview of the strengths and weaknesses of various solutions. The service provides a snapshot of key categories to consider when reviewing webconferencing solutions that include: functionality, usability, meeting setup, software installation, costs, security and system requirements.
