HOSPITAL PORTAL™.net

Information Tools for HEALTHCARE

HospitalPortal.NET
Intranet for Small and Rural Hospitals

Let HospitalPortal.NET Connect Your Hospital Now

HospitalPortal.NET is a healthcare specific Intranet solution designed to meet the needs of today's small and rural hospitals. Whether addressing clinical, non-clinical, employee self-service, or IT applications, HospitalPortal.NET enables staff to implement a true paperless environment that connects the entire organization and increases efficiency for every department in the hospital. Its standards driven, scalable, secure, and dynamic design provides a set of self-service content management and document publishing tools that enable clinical and non-clinical staff access to a broad array of information quickly and easily.

HospitalPortal.NET's Intranet is designed to connect staff in an environment where people work 24-7 and are also spread out across different floors, units, wings, and buildings. As your organization's unique content such as blogs by leadership, feature stories, news, and announcements are crafted, the intranet can and should become a dynamic destination website that engages staff and promotes organizational commitment. Meanwhile, the portal provides easy-to-use access to the critical information staff needs on a day-to-day basis in an setting where saving time can save lives.

Small and Rural Hospital Focus

The HospitalPortal.NET system was specifically developed to meet the needs of small and rural hospitals—provide a world-class system on par with larger hospitals without the development staff and budgetary demands of such a system. In fact, over half of HospitalPortal.NET clients are Critical Access Hospitals. HospitalPortal.NET actually frees up IT staff for mission-critical tasks by putting simple to administer content management in the hands of authorized departmental staff.

The HospitalPortal.NET team is keenly aware of the moving target of substantial challenges that face today's small and rural hospitals. This is why our system was created with the non-technical end user in mind, using the familiar technology tools today's staff has grown accustomed to in their personal lives, while at the same time maintaining the fill-in-the-blanks and point-and-click usability that makes the system unintimidating even to those who are apprehensive about technology.

- *Affordable*
