PayLeap

All-In-One Secure Payment Gateway Solution.

A new kind of online payment solution

With a secure payment gateway from PayLeap, you get an incredibly user-friendly online interface to submit your customers' payments and manage billing activity, along with integration options that are easy to adapt into very basic or complex website applications.

Through a single PayLeap payment gateway setup, all of your payment transactions can be processed in a variety of environments, available to you as your business grows:

ONLINE VIRTUAL TERMINAL

HOSTED PAYMENT PAGES OR API INTEGRATION

BILL PAYMENTS WITH FLEXIBILE RECURRING OPTIONS

MOBILE PAYMENTS FOR ON-THE-GO

VIRTUAL TERMINAL

The Virtual Terminal allows you to submit customer payment transactions and supports all major payment types:

CREDIT & PIN-BASED DEBIT CARDS

ELECTRONIC BENEFITS TRANSFER (EBT)

CHECKS

GIFT CARDS

Our Virtual Terminal makes it easy for you to submit transactions however you prefer, either manually keyed, or swiped through a supported USB card reader device installed to your computer. The Virtual Terminal also allows you to upload your batch information and search for pending transactions.

REPORTING

With our comprehensive Reporting feature, you can view and manage transactions in "real time" within the merchant interface.

The transaction activity reports can be downloaded in several format options, including Excel, PDF and XML. The data can be easily imported into your preferred accounting software.

INVOICING

The Invoicing section of the site allows you to store and manage your customers' data—including payment and contract information—letting you easily submit new payments or recall billing details. You can also create and send email invoices to customers for payment of goods or services.

SUBSCRIPTION CUSTOMER MANAGEMENT

Today, online businesses often cater to repeat customers. This makes the need for safe and secure storage of customer records absolutely essential. Through tokenization technology, PayLeap delivers the ability to facilitate secure customer data storage which safeguards and simplifies scheduled recurring transactions and/or secure checkout.
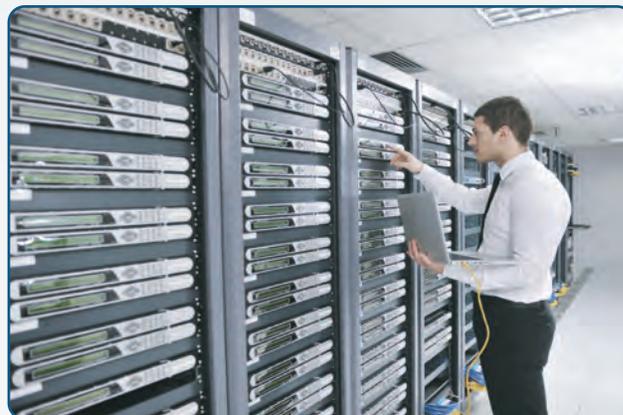

PAYMENT FORMS

The PayLeap secure payment gateway allows you to create your own Payment Forms, receipts and other online communications for your customer base. These forms can be accessed and edited at any time with easy-to-use online tools.

SECURE CHECKOUT WITH LEAPLOCK™

With Secure Checkout using LeapLock technology, merchants can retain control over the end-user experience while reducing the risks and costs associated with maintaining a fully PCI DSS-compliant environment. This innovative, CSS-driven functionality delivers a customizable on-demand secure payment form in the payer's browser for a seamless user experience.

SECURITY

PayLeap is a registered Visa® & MasterCard® service provider and a Level 1 PCI compliant payment gateway. You can rest assured that we use the highest available encryption technology and internal security practices available for internet-based transaction processing. Our networks are monitored 24/7 for any security related issues. We also use the latest technology hardware to ensure that your data is secured. PayLeap provides both 128-bit SSL encryption and secured server storage.

FRAUD PROTECTION

The secure PayLeap gateway includes fraud, risk and user customization options like AVS (address verification system) and Cvv2 (card verification value). In addition, comprehensive fraud detection and prevention tools, such as IP address block, country block, and card velocity settings provide extra security not commonly included with many gateways.

SUPPORT

PayLeap provides free phone and email support for both customers and developers. In addition, PayLeap provides a rich library of online documentation including simple, easy-to-use API guides and sample code.

About PayLeap

PayLeap is a leading, innovative, payment platform company delivering a full suite of secure payment capabilities for a wide variety of processing environments. PayLeap's secure, single-source solution includes a next-generation payment gateway with fraud management, end-to-end encryption, seamless secure checkout, cardholder data vault with tokenization, recurring invoicing and mobile capabilities. Known for innovative, secure payment processing, PayLeap is leading the evolution of gateway technology.

When it comes to managing your most important customer relationships, nobody makes it easier. Contact a PayLeap representative or reseller today to learn more about how we can simplify your customers' shopping experience, regardless of how and where you choose to accept payments.

Why PayLeap?

The success of your business is a top priority. Our secure payment gateway gives you access to a comprehensive, all-in-one online transaction system that makes the process simpler, more efficient, and safe for you and your customers. PayLeap is positioned to grow with you as we continue to innovate with more features and functionality to support our most valuable assets—you and your customers. PayLeap has successfully simplified payment acceptance by combining a turn-key payment gateway and merchant account solution into one comprehensive account. You get all of the features and benefits you need in one simple package.

We go wherever your business goes.™
