SALT AND SAND STORAGE

By combining the strength and versatility of structural steel with the proven benefits of a fabric membrane, Legacy Building Solutions is proud to offer customized structures built to your exact requirements. Our design-oriented process enables us to develop dedicated solutions with your specific operation in mind, thus ensuring we'll meet all your storage needs.

THE LEGACY ADVANTAGE

By selecting **Legacy Building Solutions**, you are not only receiving a configurable fabric building with multiple foundation options, you're selecting a dynamic structural steel facility tailored to your exact specifications. These low maintenance and superiorly designed buildings create a practical solution for your salt and sand storage requirements.

Customized Building - Create and design a structure specific to your operational needs. There is no limit to what we can build. With Legacy, you are not confined to any width, length or height restraints.

Versatility - Each building can be designed for installation on various foundations, including cast-in-place concrete walls, concrete piers in combination with precast concrete walls, helical anchors, screw piles or micropiles. The structures can also be reduced, relocated or extended.

Protection - Our hot dip galvanized frames provide the best protection in the industry. Our structures can be lined for an additional corrosion barrier and impressive interior.

Structural Steel - With our rigid frame building design, we are using a proven method of engineering that has withstood the test of time. Our structural steel will outlast and outperform widely used hollow tube steel.

Translucent Cover - Our polyethylene or PVC fabric cover is non-conductive, which reduces condensation and sweating. The fabric roof also allows natural light to filter through, virtually eliminating the need for additional lighting during daytime hours.

Cost Efficient - Our clear span interior provides you with the maximum usable floor space available. The tall sidewall clearances provide a safe area for equipment operation. Our reduced construction times allow quicker occupancy often resulting in an economical advantage.

Endurance - Backed by an exclusive 15-year warranty on the steel and fabric, our structures are engineered to handle any local wind, snow and seismic loads. Additionally, our buildings can be insulated (up to R-38).
