

# PRESS RELEASE

## Valdata Systems Goes to the Land Down Under

*Valdata Systems chosen to implement its Chemical Management System in Brisbane contract manufacturing facility*

**May 1, 2012:** Valdata Systems today announced that its Chemical Management software has been chosen for implementation in the Brisbane, Australia plant of Health Focus Manufacturing.

Health Focus Manufacturing is an Australian based contract manufacturer specializing in personal and pet care products. The company began looking for a system to meet their need for a sophisticated yet easy-to-use solution to manage their manufacturing, inventory and quality operations. After researching both local and international options, they came to Valdata.

By implementing CMS (Chemical Management System), Health Focus Manufacturing will be better equipped to meet customer deadlines while ensuring total quality from dock to delivery.

Valdata Systems President, Tom Winter, had this to say:

**"We are very happy to have Troy and his team from Health Focus as a partner. This will be our first installation of CMS down under as well as being our first customer who deals with pet care products. It further exemplifies that CMS is a world class solution that can be afforded by small and large companies both near and far."**

Valdata Systems is excited to collaborate with Health Focus Manufacturing, and looks forward to more opportunities in the Pacific Rim.
