WELCOME ADDRESS

Dear Sir/Madam,

Despite major advances in the past 25 years, HIV infection remains a global threat with major scientific, societal and human challenges ahead. With an economic crisis able to undermine public investments, access to HIV prevention, HIV treatment and care are in jeopardy.

The ISHEID seeks to promote scientific excellence and to strengthen the global commitment against HIV/AIDS. It presents new scientific knowledge and offers many opportunities for structured dialogue on the major issues facing the global response against HIV/AIDS.

The 2012 program will focus on important topics in HIV research and care and will allow different actors, clinicians, biologists, researchers and patients representatives to better work together.

Plenary sessions will address the issues of 'HIV Prevention', 'Access to Care', 'Antiretroviral Therapy Management', 'HIV Cure Research' along with the management of hepatitis C infection which is a rapidly moving field.

Ultimately, the Meeting will also tackle other emerging infectious diseases which require the same kind of global approach.

A variety of session types – from abstract-driven presentations to symposia, workshops and plenary lectures – will meet the needs of various participants. This human scale conference allows to meet international Key Opinion Leaders in a friendly atmosphere, to exchange ideas and to share experience.

The ISHEID is, therefore, the reference meeting to update your knowledge and impact your practice.

See you in Marseille in 2012!

MESSAGE DE BIENVENUE

Madame, Monsieur,

Malgré les avancées décisives obtenues ces 25 dernières années, l'infection à VIH pose un problème planétaire et des défis majeurs au niveau scientifique, humain, et de nos sociétés. Face à une crise économique qui menace les investissements publics, l'accès à la prévention et aux soins est en danger.

Le but de l'ISHEID est l'excellence scientifique tout en renforçant notre engagement contre le VIH/SIDA.

Il fait le point le plus exact sur les dernières avancées et offre de nombreuses opportunités d'échanges dans les domaines actuels de la lutte contre le VIH/SIDA.

Le programme de cette édition sera centré sur les thèmes les plus actuels : comprendre la persistance du VIH dans ses réservoirs et chercher à l'éradiquer. Nous réserverons également une place de choix aux aspects socioéconomiques, à la politique de santé, à l'accès aux soins, à la prévention et aux droits de l'homme face à cette maladie...

Le Congrès accordera aussi une place importante à la prise en charge de l'hépatite virale C et abordera d'autres pathologies infectieuses émergentes qui nécessitent la même approche coordonnée.

Différents types de sessions, des présentations plénières aux communications orales libres, posters et symposia, permettront à chaque participant de trouver ce dont il a besoin.

L'ISHEID sera en 2012 le lieu idéal pour partager ses idées, rencontrer les « leaders » et parfaire ses connaissances.

Rendez-vous à Marseille en Mai 2012 !

Alain LAFEUILLE, MD
