

Investor Fact Sheet

Tree Top Industries, Inc. (OTCBB: TTII) is a publicly traded, mini conglomerate, based in part on Teledyne's original business model.

Tree Top subsidiaries and affiliates include intellectual properties, proprietary systems, and trade secrets in the bioscience, nanoscience, clean-tech, and global health technologies, among other new and emerging technologies

Tree Top can provide the protective umbrella of a publicly listed, fully compliant, PCAOB audited company to acquisition candidates, as well as structure, transparency, potential capital raise and significant growth potential. *Tree Top* can also deliver the means, through incubation, for private companies to become public entities in good standing.

Tree Top is in the development stage, actively acquiring companies & technologies using several different business paradigms, including exchange of stock, joint venture, and other partnership configurations. One of those acquisitions by *Tree Top*, completed in 2009, is of revolutionary hazardous waste destruction technology, called the "BAT" system. This system successfully destroys, without any incineration or heavy energy use, both pharmaceutical waste which is the result of the drug manufacturing process, and regulated biomedical waste, such as diseased tissue and organs, syringes, bandages, and fluids, which are found in hospitals, clinics, and medical offices all over the world. These types of waste, if not treated, hauled, and stored in specific landfills approved for this purpose, can leach into the ground, water, and cause environmental chaos. The BAT system turns hazardous waste into harmless CO₂, Nitrogen, and steam.

RECENT HIGHLIGHTS:

TREE TOP BUYS FACEBOOK!

TTI Strategic Acquisitions & Equity Group, Inc. (TTISAEG) was formed as a wholly owned subsidiary of Tree Top to invest in other emerging companies, and to seek out forward thinking entrepreneurs for possible investment. The focus of future investments will be in fast-growing technology companies that are beyond early stage. TTISAEG recently purchased **FACEBOOK** shares in the Secondary market in anticipation of the upcoming IPO.

Management Team:
David I. Reichman, CEO
Kathy M. Griffin, President

Management Team

David Reichman – CEO

Mr. Reichman has been the CEO of Tree Top for nine years. Previously, Mr. Reichman maintained a Business Management and Tax Law consulting group, and he is licensed by the US Treasury/Internal Revenue Service. In addition, Mr. Reichman, was Co-General Partner in Harrison Re-cycling Associates, a company that operated the first recycling equipment for non-biodegradable Styrofoam in North America. Mr. Reichman also was employed by American Express as Manager of Budget & Cost, as well as other executive positions and serves on several Boards. Mr. Reichman's education includes an MBA from Northeastern University.

Kathy M. Griffin – President

Mrs. Griffin has been president and on the board of Tree Top for three years, and has extensive professional experience in new business development, marketing, general business operations in the US & internationally. Mrs. Griffin started her career at Superior Brands, where she held several positions, including International Marketing Manager. In addition, Mrs. Griffin worked at Specialized Technology Resources, Inc. a global provider of supply chain, corporate social responsibility and consulting services. Mrs. Griffin's education includes a BA from Boston College and advanced study at the University of Massachusetts John McCormack Institute for Public Policy and International Relations.

Tree Top Industries, Inc. “Family of Companies”

GoHealthMD, Inc. was formed to house global healthcare solutions, products, and emerging technologies, primarily geared towards the developing world. GoHealthMD specializes in finding and developing new and innovative healthy lifestyle products, such as those being manufactured by Pipeline Nutrition, a potential acquisition for Tree Top.

BioEnergy Applied Technologies, Inc. was formed to house and develop various proprietary, clean-tech, environmentally friendly technologies and intellectual properties in the areas of waste destruction, coal gasification and renewable energy. BioEnergy was acquired to exploit its 15 key intellectual properties, which have been applied to the construction of systems and equipment designed to facilitate the destruction of pharmaceutical, medical, biological, red bag and other hazardous wastes, with clean reusable energy as a byproduct.

GoHealth Nano Pharmaceuticals, Inc. was formed in 2012 to house the patents, intellectual properties and professional expertise of the doctors involved in Adesso Biosciences, Ltd. when that company is acquired by Tree Top Industries, Inc. The anticipated close of this acquisition is sometime late in the second quarter of 2012.

Eye Care Centers International, Inc. was formed to support the further growth and development of **World Without Blindness**, an organization whose primary mission is to bring patented eye screening equipment to the developing world. The WWB technology uses objective parameters instead of traditional subjective eye chart examinations, to screen children as young as six months old. The screening can accurately indicate predisposition for glaucoma and other eye diseases which can lead to permanent blindness.

Sky Entertainment, Inc. was formed in 2011 to house the potential acquisition of **Sky Corporation**. Sky Corporation is headquartered in Belgrade, Serbia and is the largest event production and entertainment management company in South Eastern Europe, and has experienced double-digit growth in recent years.
