# IMPROVE YOUR BUSINESS BY MAKING BETTER DECISIONS

## 1. Structure your problem

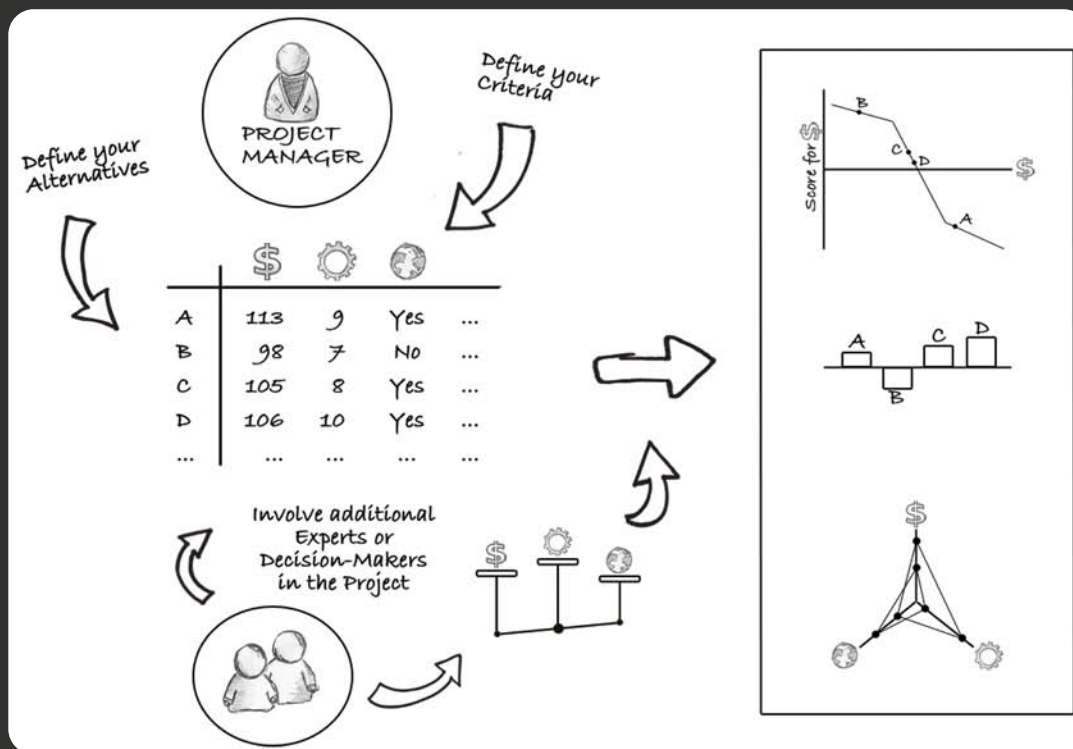

Define your criteria and create a hierarchy to structure your data

## 2. Define your preferences

Each decision is unique: define your preferences and identify their impacts

## 3. Involve your teams

Combine the input from different stakeholders and get the collective results immediately

## 4. Manage conflicting priorities

Identify conflicts and synergies at a glance

## 5. Get visual results

The visual tools allow for quick comparison of one alternative to another

## 6. Be confident in your choice

Benefit from the “what if” analysis tools that allow you to be confident in your decision right away

D-Sight provides software products and services to help you manage your decision making process
