**ILLINOIS BONE AND JOINT INSTITUTE PARTNERS WITH EMDAT TO DELIVER ADVANCED PATIENT CARE THROUGH HIGHLY PRODUCTIVE MEDICAL DOCUMENTATION**

**Fitchburg, Wis. (May 17, 2012)** – [Emdat Inc.](#), leading provider of web-based medical documentation software, today announced a partnership with [Illinois Bone and Joint Institute \(IBJI\)](#). A premier provider of orthopaedic, rheumatologic and podiatric services, IBJI is using a host of Emdat applications to increase productivity, accuracy and continue to provide the best care possible, including:

- [Emdat Mobile](#) allows to IBJI to bridge the gap between physicians and their Electronic Health Records (EHRs). Now, IBJI's nearly 90 physicians can review appointments, create and upload dictations, and edit, review and approve completed transcriptions on their Apple iOS or Android mobile devices.
- [InSync](#) and [InTouch](#) provide advanced voice recognition (VR) and [Qualified Text](#) capabilities, so IBJI can focus on providing award-winning care in 25 specialized clinical areas, reduce costs and increase dictation productivity.
- [Inquiry](#) and [InCommand](#), both HIPAA-compliant applications, make medical documentation and its management more efficient than ever before by streamlining workflow. Patients can be assured their records are secure and accessible by physicians at all 20 IBJI locations.
- [ShadowScribe](#), speech understanding technology supported by M\*Modal, improves production time, reduces per line labor costs, and improves the quality and consistency of medical reports, enabling the IBJI team to bring the latest technology to their comprehensive services.

“Successful use of EHRs in our locations depends on physician productivity and satisfaction, which require solutions that make documentation easier and less time consuming. One way in which we are able to help physicians focus on patients and boost the return on EHR investment is through Emdat Mobile,” said David Wold, Chief Operating Officer at IBJI. “We see tremendous value in integrating the Emdat platform and have already experienced their superior implementation and ongoing service.”

Emdat is working with IBJI to implement its suite of solutions throughout all IBJI sites in the Chicago-land area.

“Illinois Bone and Joint Institute is at the forefront of world-class orthopaedic care and we are excited to help their physicians and staff continue to do what they do best,” said Emdat CEO Randy Olver. “Now, they can spend less time looking at computer screens and more time focusing on their patients – an increase in productivity that is a win-win for everybody.”

## **ABOUT EMDAT**

[Emdat, Inc.](#) provides medical facilities, physicians and documentation service providers with a web-based suite of applications that maximizes clinicians' productivity and accuracy when documenting patient encounters. Emdat's unified platform streamlines the documentation workflow and populates EHRs and other clinical repositories with data derived from the timesaving process of dictation. Emdat's exclusive [Qualified Text](#) feature increases efficiency while reducing documentation costs. Headquartered in Fitchburg, WI, Emdat works with more than 2,600 medical facilities throughout the United States and a network of hundreds of documentation service providers worldwide. More information on Emdat is available at [www.emdat.com](http://www.emdat.com).

## **ABOUT IBJI**

With nearly 90 orthopaedic physicians specializing in over 25 clinical areas, the Illinois Bone and Joint Institute is the leading provider of orthopaedic, rheumatologic, or podiatric services in the
