All the required products are easily available in any household, and the suggested treatment techniques are almost painless. Dental floss can be extremely useful in removal of skin tags. According to www.skintagshelp.com, the blood circulation to the tag can be cut off by attaching the floss firmly to its base. This dries up the area and allows the lump to fall off. Skin tags can also be carved off with the help of a pair of scissors. This method, however, requires some precautions and is not recommended for the faint hearted.

Interestingly, [skin tag removal](#) can also be accomplished by potato, garlic, and apple cider vinegar. Repeated use of these common remedies can effectively pacify and remove skin tags.
