PTS Data Center Solutions Open House Highlighted by Emerson Network Power Smart Solutions Tour

Franklin Lakes, NJ, May 23, 2012 — On May 16, 2012, PTS Data Center Solutions, a turnkey solutions provider specializing in data center and computer room consulting, engineering, infrastructure, construction, and maintenance services, hosted a half-day open house featuring the Smart Solutions by Emerson Network Power.

Attendees of the open house had the opportunity to learn ways to expand data center and IT capacity and optimize their data center energy consumption. Tours of the Smart Solutions SmartRow™ system were available as the open house included a flatbed container housing the solution.

Smart Solutions combine leading power, cooling and infrastructure management systems with industry best practices in design and operations in an integrated solution. With Smart Solutions in place, users can cost-effectively achieve key data center objectives - capacity, efficiency, availability and control - without sacrificing any.

"It is refreshing to see Emerson Network Power aggressively seeking new approaches to address the problem of computer room deployment time," said PTS' Founder & President, Peter Sacco. "Their Smart Solutions will give PTS' clients even more choices of how to best keep pace with the ever-taxing demands their IT systems growth has on their facilities."

In addition to tours of the SmartRow, visitors had an opportunity to tour the PTS data center and discuss other exciting solutions such as Emerson Network Power's *Trellis*™ real-time infrastructure optimization platform. PTS Data Center professionals also discussed the latest trends in green data center design and energy efficiency upgrade programs.

About PTS Data Center Solutions
Founded in 1998, PTS is a turnkey solutions provider specializing in data center and computer room consulting, engineering, infrastructure, construction, and maintenance services. We offer a broad range of project experience in designing data centers, computer rooms, and technical spaces. We employ industry best practices in integrating proven, 'best-of-breed', critical infrastructure technologies that result in always available, scalable, redundant, fault-tolerant, manageable, and maintainable mission critical environments.

In today's highly competitive climate where businesses can't stop and downtime is measured in profits lost, PTS offers survey, assessment, strategy, planning, feasibility, engineering, design, construction, commissioning, implementation, monitoring, maintenance, and predictive analysis services for protection against of some of the leading causes of critical systems downtime, hardware damage, data loss, and decreased employee productivity. Highly respected in our industry, PTS sets the standard for 'always available' solutions for data center and computer room environments.
