

## Ash Trees Face 100% Fatal Pest: *Emerald Ash Borer*

**Do you have Ash Trees?** [Emerald Ash Borer](#), is killer that is 100% fatal to Ash Trees. All Giroud customers are in the high risk zone.

Emerald Ash Borer Treatment works. The photos below were taken in 2009 and then again in 2011. The first tree was consistently treated while the second tree was not. You can see how Emerald Ash Borer destroys trees and the power of treatment to keep your Ash Trees safe and healthy.

**2009:** *Emerald Ash Borer damage has begun and the tree in the middle is in decline. The tree in front is still relatively healthy and a good candidate for treatment.*

**2011:** *The tree in front was treated in 2009 and is in good health. The tree in the middle was not treated and is dead.*

Treatments are available and the only way to protect your Ash Trees from this deadly pest. Giroud has identified the best treatment options based on extensive research conducted by the USDA and state universities.

To learn more, please check out our [Emerald Ash Borer Fact Sheet](#). It gives you a quick view of the problem, treatments and actions required.

Have your Ash Trees inspected now to determine if they are good candidates for treatment. Your Giroud Arborist will evaluate your tree, discuss its value to your landscape and the best treatment option. [Contact us](#) or call 215-682-7704.
