

## Iris Data Services announces VISION All-Inclusive eDiscovery Electronic Discovery Company Offers per Custodian Discovery Service

**KANSAS CITY, May 29, 2012** — Iris Data Services, a leading provider of discovery solutions, announced today that it has launched an all-inclusive, per custodian discovery service called **Iris VISION** which includes forensic collection and culling, early case assessment data reduction, electronic discovery processing, online hosted review using the industry leading Relativity® platform, computer-aided attorney document review, and document production. Iris Data Services is a leading supplier of discovery solutions including electronic discovery, computer forensics, attorney document review, and online hosting.

“Two of the biggest challenges in complex litigation are how to defensibly collect and reduce the amount of evidence that must be reviewed for responsiveness, while at the same time predicting and managing the costs of each stage of the discovery process,” said Iris president, Major Baisden. “**Iris VISION** answers both challenges by providing a predictable, per custodian price for all the discovery services needed from collection to processing to review to production.”

“**Iris VISION** takes the guesswork out of electronic discovery budget considerations,” said Damon Goduto, Iris’ Vice President of Sales. “**Iris VISION** provides predictable, end-to-end, eDiscovery services while at the same time defensibly culling data at every step of discovery process—at forensic collection, during ECA review, while searching and processing, and finally during document review using analytic tools and proven computer-aided review processes. **Iris VISION** allows Iris to do what we do best, focus on culling data, and in turn, save our clients valuable time and money.”

### About Iris VISION

**Iris VISION** is an all-inclusive, per custodian discovery service that includes Forensic Collection and Culling, Early Case Assessment review, data processing including native and TIFF file productions, hosted review for one year using the industry leading Relativity® platform, computer-aided coding using Relativity Assisted Review, Attorney Document Review, and all associated Project Management services. Throughout the **Iris VISION** process, datasets are defensibly reduced so that legal teams can confidently review only the files necessary as they prepare their case.

### About Iris

Iris Data Services is a leading supplier of discovery solutions including electronic discovery, computer forensics, document review, and online hosting. Lead by recognized experts in electronic discovery

The IRIS logo features the word "IRIS" in a white, serif font, with a red swoosh underline that extends to the right.
