Welcome to Easymeeting

We know your time is extremely valuable. We also know that your time is not renewable.

We believe we can use our time better than we do today. It is a paradox that we use three times more time in traveling to meetings than in the meeting itself. This is time that can be used for more important tasks at the office, and with family and friends.

Easymeeting is a cloud based videoconferencing service that is easy to use, and without need to invest in complex infrastructure.

Experience how Easymeeting can change the way we use our time - today!

Hans Johan Tofteng, founder

Effective communication

You will save both time and money by traveling less and spending more time in your office, or even better, with your clients. Perhaps holding more frequent and productive meetings than before.

Effective communication is important in attaining your goals and Easymeeting is bringing positive change in meeting and communications behavior.

What does this mean to you?

- Better and more effective use of resources, affords a better bottom line.
- Stronger relationship and better proficiency with distant colleagues.
- Significant travel cost savings.
- Shorter project completion times!
- A more attractive workplace for skilled professionals.

Easymeeting is a complete and ready to use solution. We assemble the service and product bundles for you. You can meet, see each other, share information and have productive meetings anywhere without leaving the office.

Meet them all

EasyConference is a cloud service that enables several video conferencing systems to connect in the same meeting.

This means that we can see and hear all participants simultaneously, and we can share presentations in the same meeting.

This is a cloud service where you seamlessly can collaborate with any videoconferencing system, PC/Mac, iPhone/iPad.

Easymeeting free services

Easymeeting enables all systems to allow faster communication that is easier to use. Our EasyNumber is the “dial-tone” for videoconferencing systems.

The Easymeeting platform not only allows faster communication but empowers existing videoconferencing systems enabling them to connect with mobile devices as PC/Mac, iPad and iPhone.

Another free services is the Easymeeting Catalog, where you can list your own systems.

Easymeeting does not restrict you from dialing the traditional way of using IP addresses. We just think our way is easier!
