## **Sage ERP X3 Practice Continues to Grow for RKL eSolutions**

*The Pennsylvania-based ERP and technology provider adds four new Sage ERP X3 customers, expanding footprint into Europe and South Africa.*

**Lancaster, PA – June 5, 2012** – RKL eSolutions (<http://www.rklesolutions.com>), an ERP business software and technology provider headquartered in Pennsylvania, has announced the recent addition of four new Sage ERP X3 customers to its client roster. The company cites the range of features and scalability for growth as primary customer considerations driving new sales of Sage X3.

Joe Noll, President at RKL eSolutions, says that the diverse makeup of the new customers speaks to the flexibility of [Sage ERP X3](#). “They include 2 smaller businesses and 2 multinational companies, all of whom chose Sage X3 for the range of functionality they’re getting out of the box – all without the cost and complexity that many competitive ERP applications are saddled with.”

Noll adds that RKL eSolutions brings a depth of [manufacturing knowledge](#) to the table that was instrumental in these deals. “We were able to demonstrate our expertise in both discrete and process manufacturing which turned out to be important factors in two of the new opportunities.”

Regarding the consulting team at RKL eSolutions, Noll adds, “Over the last year or so, we’ve ramped up our in-house consulting resources and have put together an impressive team and strong Sage X3 business unit. We’ve built a deep bench of business consultants and technical support staff that can meet the needs of companies that range from large multinationals to smaller manufacturers.”

The Sage X3 web-based ERP platform has gained market notice for its suitability to mid-sized businesses that are growth-oriented and focused on the future. In that way, Noll points out that RKL eSolutions and the new Sage ERP X3 clients share a common philosophy. “They’ve made a commitment to finding and investing in the right technology just as we’ve done here at RKL eSolutions. As we continue to build out our Sage X3 practice, we’re focused intently on delivering quality because our objective is to become the best Sage X3 provider, not necessarily the biggest.”

The new sales expand RKL’s footprint to include clients in the United States, Europe, and South Africa.
