

AccessPoint **CPAC**[™]

A configurable, cloud based
PACS system from Freeland Systems.

AccessPoint cPac[™] by Freeland Systems provides a configurable cloud-based PACS system including image and intelligent reporting solutions, disaster recovery, and back-up solutions for all medical facilities; ranging from hospitals, to multi-site medical practices, to single practitioners, and mobile providers.

CPAC Features

- Cloud-based access and storage
- Disaster recover
- Back-up solutions
- Local application
- Active polling of available study data

CPAC Benefits

- Shift storage costs
- Minimize impact of hardware obsolescence
- Billing options best suited for budgeting needs
