Case Management Data Lifecycle — Storage, Retrieval, Retention, Manipulation, Archiving, Viewing, Sharing

**Our Resources**

We are public safety consulting professionals with backgrounds in law enforcement and technology.  Our vast experience and great connections bring about success for our clients.  Through our technology implementations, vendor selections, project management and assessment services, PRI Management Group helps improve public safety by managing information better.  We focus on building sound records management and information sharing operations by implementing new or using existing technology, developing efficient business processes and ensuring the production of accurate data.   We strongly support good government and work closely with you to achieve it.
