e-Cycle
Recycle. Recover. Protect.

**Trusted mobile buyback,
data security, and recycling**

e-Cycle helps organizations take a responsible, secure and profitable approach to wireless mobile phone recycling. e-Cycle collects used mobile phones and tablets from businesses and organizations, reimbursing them for devices that retain value and recycling all others at no charge. The information on every phone is either deleted or destroyed using the most comprehensive data security processes in the industry.

e-Cycle serves more than 13,000 business clients and is the trusted mobile recycling partner to the largest enterprises in the world. e-Cycle is ranked as one of the most promising companies in the U.S. by **Inc.** and **Forbes**. In January 2012, e-Cycle became the only mobile buyback and recycling company in the world to be e-Stewards® certified.

The First e-Stewards®, ISO 14001 and R2 certified mobile buyback and recycling company in the world

**e-Stewards
certified**

Do you know your recycling company? The EPA estimates that 70-80% of electronics recyclers export toxic waste overseas, harming workers and polluting the environment. Your brand, the security of your data and your stature as a good corporate citizen are all threatened by recyclers who do not follow transparent standards for handling your electronic devices.

The e-Stewards® Certification program, created by the Basel Action Network (BAN), provides assurance that e-Cycle consistently adheres to the highest global standards for responsible recycling and reuse of electronic equipment, data security and worker safety. Accredited, independent auditors certify e-Cycle and our downstream vendors via rigorous annual audits.

RECYCLE

Mobile devices and accessories that have outlived their market value are collected and recycled free of charge.

Cost-free recycling and complete environmental protection

- **e-Stewards®, ISO 14001 and R2** - We strictly prohibit the export of e-waste into developing countries and the use of prison labor.
- **Zero-Landfill Policy** - All end-of-life devices and accessories are shredded on-site and recycled to keep harmful toxins — such as lead, mercury, and arsenic — out of our landfills.
- **Environmental Impact Statements** - We track and report the positive environmental impact of your recycling program.

RECOVER

e-Cycle compensates your organization for wireless devices that are reusable and retain value.

Turnkey wireless asset recovery

- **Fast Payments** - Devices are quickly audited and processed for payment.
- **Free Shipping** - Complimentary shipping from anywhere in the U.S.
- **Unparalleled Service** - Account Managers throughout the U.S. provide personal support.
- **Comprehensive Reporting** - Complete inventory reports of your mobile assets.

PROTECT

Reusable devices undergo comprehensive data removal processes and quality-assurance testing to ensure sensitive data is permanently deleted.

Rigorous, industry-leading data security

- **Complete Data Deletion** - e-Cycle uses multiple data sanitizing and quality control processes to make certain all confidential information is completely deleted.
- **Forensic Verification** - Independent auditors validate our processes.
- **Testing for Active Lines** - e-Cycle tests for active phone lines that can result in data breaches and unnecessary service charges.
- **Secure Operations** - Limited access, high-security facility and thorough employee background screenings.

“There is simply too much at stake regarding data security and the environment, and too much to lose financially. e-Cycle provides everything we need to manage these important issues. They are a true partner to our business.”

– Pepperidge Farm

Recover:
Free shipping and
fast payments.

Recycle:
Zero-landfill policy.

Protect:
Complete data security.
