LEADERSHIP & EXECUTIVE DEVELOPMENT BREAKOUT SESSIONS

12:00 – 1:00 pm Maryland 1	Ready, Aim, Fire! Leadership Insights from Wimlink Women and Leadership Study <p>Are you on the right track for leadership? What makes a great leader, and can this be learned (by you, or others)? In a recent study, Wimlink surveyed women professionals, executives and entrepreneurs across a variety of fields, and the results were surprising: there is a startling disconnect between the qualities they rated as those of exceptional leadership, and those that they rated highly in themselves. Join us for an overview of the Women and Leadership Study, and learn which attributes we need to let go of and which to focus most on to fast-track our own leadership success, and to stop holding ourselves back.</p>
12:00 – 1:00 pm Maryland 2	Unlocking Your Potential <p>All of us are endowed with the possibility of potential...the possibility of setting positive visions in motion to achieve desired full and meaningful lives. Potential is in itself invisible, yet it can guide and inspire us to live influential lives.. In this session, you will examine the process and skills you will need to move toward the unknown by seizing opportunities, getting out of your own way, being persistent, and responding with positive actions that break down barriers toward self-directed results.</p>
12:00 – 1:00 pm Maryland 3	Empathetic Listening Is an Art & Leadership Skill <p>Communicating with diverse communities is a two-way process. The role of the listener is as important as the speaker's. Whether you are in congruent dialogue or communicating in the global marketplace, building relationships with business partners, opinion leaders and foreign audiences are goals. In this session, you will learn more about active listening, non-verbal listening, hidden messages, subtle actions, and sensitivity to apply these tools in our daily encounters within the U.S. or abroad. There is a positive relationship between successful leadership and strong listening skill.</p>

LEAD WITH PASSION, POWER & PROFITS

12:00 – 1:00 pm Maryland 4	The 10 Lenses - The keys to unlocking hidden bias toward women The 10 Lenses are ten distinctly different belief systems that influence how individuals view and respond to personal, cultural and organizational identity. The Identity Lenses are a decoding device — a key to managing conflict, increasing effectiveness and creating positive change in individual employees as well as institutional systems, organizations and communities. In this session, you will experience three of the 10 Lenses in a dynamic interactive experience and address some of the attitudinal and systemic issues women face in advancing their careers in organizations. You will also learn how these strategies can break through barriers and shift attitudes to promote greater opportunities.
12:00 – 1:00 pm Maryland 5	Purpose, Power & Passion: The 3 Ps to Chart Your Own Course Why do some people seem so clear about where they are headed? Why do some people exude “power,” personally and professionally? Why are others consistently engaged with their emotions and are able to demonstrate passion and commitment? In this session, you will examine how to be intentional about why and how you do what you do, the benefits that come with that knowledge in terms of influence and power, and how to identify what motivates you to succeed which translates to passion.
	Pearls of Wisdom: Our Braided Lives “Pearls of Wisdom: Our Braided Lives” is a mentoring initiative centered around STEM (Science, Technology and Math) and designed to nurture a deeper relationship between professional women and high school girls through the use of quotes from well-known women from all generations and by embracing diversity. This initiative encourages women and girls to bond and find a commonality through these quotes. The “braided lives” objective pairs women and girls as mentor/mentee and engages them in conversation using the quote of a well-known woman as a discussion point. The selection of the quote fosters an opportunity for open dialogue as well as an appreciation of the common thread that unites the mentor/mentee together for selection of the quote. Since our future rests with how we inspire our young women to become the next generation of innovators solving society’s challenges, established and professional women can often be the catalyst that sparks a young person’s pursuit of exploration through the foundation of science, technology, engineering, and math. This community outreach sponsored by KPMG will bring in high school students giving attendees an opportunity to give back by participating as a mentor in this session.
