## Oxygen Software opens the season of summer discounts, Offers Customers a Hot Discount on the second and the third Analyst licenses

Summer is the best time to discover new options and discounts. Stuck at work while everyone else is leaving for a vacation? No reason to be sad, time to rest is not far off. To improve mood and share a unique opportunity, the Oxygen Software Company welcomes everyone to receive hot summer discounts on the second and the third Oxygen Forensic Suite Analyst licenses. The purchase of the first Analyst license at a full price will bump 60 per cent off the regular price of the second Analyst license. And moreover, the purchase of two Analyst licenses at a regular price will give a 90 per cent discount on the third Analyst license. There are no restrictions and no strings attached. Offering hot discounts has become a long-term tradition with Oxygen.

### Terms and Conditions

Oxygen Software grants all customers a 60% discount towards the purchase of the second Oxygen Forensic Suite 2012 Analyst license and a 90% discount towards the purchase of the third Oxygen Forensic Suite 2012 Analyst license. The discount is available in the form of a special offer. To claim the discount, customers need to put at least one Analyst license to the cart on Oxygen Software official site.

The special offer has no cash value and cannot be resold or exchanged. This special offer cannot be combined with any other offer, coupon or discount. The special offer is valid during the July 2012. This is a "no strings attached" offer; the use of this discount does not affect customers' right to upgrade, the right to use Oxygen Customer Support, future maintenance or upgrade prices in any way.

### About Oxygen Forensic Suite 2012

Oxygen Forensic Suite 2012 helps investigators and forensic specialists access and analyze data from a variety of mobile devices such as cell phones, smartphones, communicators, PDA and tablet PCs. Currently supporting more than 5,000 different models, Oxygen Forensic Suite 2012 covers the widest range of mobile devices compared to competition, and allows fully automated acquisition and analysis of supported devices.

The unique Timeline feature offers convenient, single-place access to all activities and movements performed by the user arranged by date and time. Investigators can track user location at every moment, build and map their historic routes, and clearly see all activities performed by the user at each location.

Another signature feature of Oxygen Forensic Suite allows investigators performing a global search on all devices ever analyzed with the toolkit. The global search quickly reveals any connections (e.g. common contacts, exchanged calls, texts or emails) between the phone owners.

Oxygen's statistical analysis tools allow investigators discover social connections between the users of multiple mobile devices. Calls, text messages and Skype conversations are analyzed to produce charts and tables revealing the users' closest circle at a glance.

Oxygen Forensic Suite 2012 guarantees zero-footprint operation, leaving no traces and making no modifications to the content of the devices, making it the tool of choice among government and law enforcement agencies, security services and forensic organizations in more than fifty countries.
