

Sirius Press Sheet

Company Profile

For more than three decades, Sirius has been helping organizations solve complex business challenges by implementing cohesive solutions that are designed to improve efficiency, reduce costs, and make them more competitive. Extensive investments in our people, products and partnerships have allowed Sirius to build a highly certified, nationwide organization of technical, sales and services professionals who provide technologies from across the spectrum of information technology. We back it up with post-sale support to help clients get the maximum benefit and value from their investments. Then we provide maintenance, software subscriptions and financing to ensure that clients have the long-term support they need, as well as the technological and fiscal strategy that will be most beneficial for their organizations.

- ♦ Approximately 1,100 employees, with sales locations across the U.S.
- ♦ Regional Sirius Technology Enablement Centers (TECs)
- ♦ A Command Center for Managed Services offerings

Best-of-breed products

With the right people and the right partners, Sirius is able to focus on the right products to help IT professionals cut costs, increase reliability, ease the management burden, maximize flexibility, mitigate risk and improve service. We require our teams to be certified in multiple disciplines and products so they can help you get from the high-level architecture of a solution all the way down to the tactical configuration and implementation of point products.

Cross-industry clients of all sizes

Sirius offers integrated, multivendor technology solutions that meet the requirements of today's data centers, from small businesses with fewer than 100 employees to large enterprises with thousands of employees and hundreds of locations.

OUR SOLUTIONS

Because our clients need more than just discrete hardware, software and services offerings, Sirius offers complete solutions that help them overcome their most difficult business and IT challenges. Every solution we provide is integrated, implemented and supported by our highly certified consultants, using proven methodologies.

Business Continuity: Ensure availability with Backup, Recovery & Archive, High Availability, and Disaster Recovery

Security: Minimize risk with Application & Information Security, Governance & Compliance, Managed Security, and Cloud Security

Cloud: Implement successful Public, Private or Hybrid Cloud environments

Video & Collaboration: Increase collaboration between employees, customers, partners with Video, Voice, and Unified Communications

Software & Applications: Improve service levels with Commerce, Information Management, Business Analytics, and Enterprise Modernization solutions

IT Infrastructure Optimization: Optimize IT investments with best technologies and practices for Consolidation, Virtualization, and Optimization

IT Infrastructure Implementation: Implement industry-leading products including Servers, Storage, Networking, Voice, Software, Security, PCs and Mobile

OUR PARTNERS

As Sirius has grown into one of the largest IT solution providers in the U.S., we've aligned ourselves with the industry's leading technology manufacturers, developers and distributors. Our clients' challenges frequently require solutions from more than one manufacturer, so we partner with strategic vendors whose technologies will help make them more successful. And we employ staff who continually evaluate potential partners and their products or services, to ensure our clients have access to a complete range of useful solutions. Today our partners comprise technology innovators with strong market presence and long-term, sustainable business strength, including (but not limited to):

- + Cisco
- + Citrix
- + Dell
- + HP
- + IBM
- + Lenovo
- + Microsoft
- + NetApp
- + Novell
- + Oracle
- + Red Hat
- + SAP
- + Symantec
- + Vision Solutions
- + VMware
