

For immediate release:

PTS Becomes Strategic Partner of Quorum to Deploy Turnkey Disaster Recovery Solutions

Franklin Lakes, NJ, July 10, 2012 — [PTS Data Center Solutions](#) announced today it has been accepted as a Strategic Reseller Partner by [Quorum®](#). The announcement comes as Quorum continues to build momentum in delivering its appliance and hybrid cloud backup, recovery and continuity solutions.

Quorum's disaster recovery solutions were engineered from the ground up to provide enterprise level Disaster Recovery without the complexity or cost of traditional solutions. Quorum puts all of a company's applications and data back online within minutes of a storage, system or entire site failure. Customers can deploy Quorum solutions to meet their needs—locally for High Availability (HA), remotely for Disaster Recovery, or both as well as Hybrid Cloud Disaster Recovery Solution. The solutions are offered in a range of sizes to match almost any requirement and also as a service through their Value Added Resellers (VARs).

"PTS is pleased and excited to be able to deploy the Quorum solutions to our small to mid-size clientele," said PTS' Founder & President, Peter Sacco. "With PTS' [Business Continuity & Disaster Recovery Consulting Services](#) and the Quorum appliance-based and Hybrid Cloud Disaster Recovery Solutions in place, our customers have peace of mind knowing their revenue, customers, and reputation are safeguarded. The solutions are scaled to support smaller clients with just a few physical or virtual servers but can scale to support larger mid-size clients."

The [Quorum solutions](#) provide:

Easy Continuity & Comfort

- One-Click Recovery™ system
- One-Click Testing
- Replicates anywhere—compressed & encrypted
- Protection for storage, system & site failures
- Integrated server monitoring
- Email and text alerts
- Scheduled email health reports

Data Protection & Recovery

- Full local backup of entire system
- Supports physical and virtual servers
- Sub file-level incremental updates
- Global de-duplication at source
- Powerful exclusion rules
- Restore to any snapshot level
- File-level recovery to any snapshot level
- Windows Share Restore

Flexible Deployment

- Offsite or in the cloud
- Bandwidth throttling
- Internal and External storage
- No GB or monthly storage charges
- Supports all apps without add-ons

About PTS Data Center Solutions

Founded in 1998, PTS is a turnkey solutions provider specializing in data center and computer room consulting, engineering, infrastructure, construction, and maintenance services. We offer a broad range of project experience in designing data centers, computer rooms, and technical spaces. We employ industry best practices in integrating proven, 'best-of-breed', critical infrastructure technologies that result in always available, scalable, redundant, fault-tolerant, manageable, and maintainable mission critical environments.

In today's highly competitive climate where businesses can't stop and downtime is measured in profits lost, PTS offers survey, assessment, strategy, planning, feasibility, engineering, design, construction, commissioning, implementation, monitoring, maintenance, and predictive analysis services for protection against some of the leading causes of critical systems downtime, hardware damage, data loss, and decreased employee productivity. Highly respected in our industry, PTS sets the standard for 'always available' solutions for data center and computer room environments.
