BACnet International Welcomes Leviton Manufacturing

Joins in Collaborating to Achieve Global Interoperability

Atlanta, GA (PRWeb) – July 12, 2012 – BACnet International has welcomed Leviton Manufacturing Co., Inc., a pioneer in electrical devices, lighting controls and network solutions as silver members. As a trailblazer in intelligent buildings and lighting energy management, Leviton works to enhance safety and increase savings for customers in the areas of energy, time and cost.

By joining BACnet International, Leviton joins over 80 of the leading building automation vendors around the world in pursuing advancement of global interoperability.

“We are pleased to have another partner in working toward the goal of global interoperability,” said BACnet International and Philips Teletrol President Andy McMillan. “Leviton is a welcome addition to the BACnet International community.”

“Leviton is proud to be a member of BACnet International,” said Richard Westfall, Vice President/General Manager of Leviton Lighting and Energy Solutions. “We value the partnership between Leviton and BACnet to set standards throughout the building automation industry. As an industry leader, we understand the importance of achieving global interoperability, and look forward to working with BACnet International as a collaborator in reaching this goal.”

More information on BACnet International members can be found [here](#). Companies interested in enjoying the benefits of BACnet International membership can get more information [here](#).

About BACnet International

BACnet International is an industry association that facilitates the successful use of the BACnet protocol in building automation and control systems through interoperability testing, educational programs and promotional activities. The BACnet standard was developed by the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) and has been made publicly available so that manufacturers can create interoperable systems of products. BACnet International complements the work of the ASHRAE standards committee and BACnet-related interest groups around the world. BACnet International members include building owners,

consulting engineers and facility managers, as well as companies involved in the design, manufacturing, installation, commissioning and maintenance of control equipment that uses BACnet for communication. For more information, please visit www.bacnetinternational.org.

About Leviton Lighting & Energy Solutions

Leviton Lighting & Energy Solutions products meet or exceed federal, state and industry building standards, and often enable customers to qualify for tax incentives and work toward earning LEED credits. A member of the United States Green Building Council, Leviton products include self-powered wireless occupancy sensors, lighting control relay systems, intelligent dimming systems and controls and daylight harvesting systems used in green buildings around the world. In addition, Leviton submetering and energy management software solutions allow users to measure and monitor energy usage. Learn more at www.leviton.com/les.

About Leviton

Leviton is the smart choice for the global electrical industry, providing the most comprehensive range of solutions to meet the needs of today's residential, commercial and industrial buildings. Leveraging more than a century of experience, Leviton helps customers create sustainable, intelligent environments through its electrical wiring devices, network and data center connectivity solutions, and lighting energy management systems. From switches and receptacles, to daylight harvesting controls, networking systems, and equipment for charging electric vehicles, Leviton solutions help customers achieve savings in energy, time and cost, all while enhancing safety.
