

MHF Services for Nuclear Utilities

MHF is a full service provider for the disposition of environmentally sensitive materials. We evaluate each site's capabilities and needs to determine the specific services required to achieve the desired result in the most safe, compliant, efficient, and economical means.

- Design and fabrication of flexible and metal containers for compliant packaging of environmentally sensitive materials
- Turnkey disposition services for oversized components such as MSRs, Turbine Rotors, and Steam Generators
- Restoration of retention ponds contaminated with tritium to Brownfield status
 - Full Remediation
 - Disposition of Wastes
 - Back Fill
 - Seeding to match surroundings
