

DSMAC wins to be excellent supplier of Lafarge for its crusher parts

DSMAC has become the excellent supplier of Lafarge for its crusher parts this year. The contract includes high manganese steel [crusher hammer](#), SANDWICH® Super High Chrome hammer, and XPCF400 fine crusher, and the total value is about EUR 18 million. DSMAC has been a good partner of Lafarge Group since 2008.

Lafarge Group holds the world's top-ranking position in Cement, Aggregates, Concrete and Gypsum. Also it is named as one of the top 100 Most Sustainable Companies in the World. In 2010, the CEO and senior executives of Lafarge Ruian Cement Co., Ltd. were invited to visit DSMAC, and they were shocked by the new invented hammer again. After times of tests, they were surprised that the service life of the new invented hammer can be improved by 320%, while the cost added less than 100%.

“We look forward to cooperate with such a reliable supplier and DSMAC will be our main partner in cement production promotion project. I feel it's worthwhile to visit DSMAC production area.” adds Lafarge, CEO of Lafarge Group.

[DSMAC](#) advance anti-wear parts and crusher bring you benefits

According to the contract, DSMAC will supply a series of wear-resistant parts this year, including high manganese steel crusher hammerhead, SANDWICH® Super High Chrome hammer, etc. And a special designed XPCF400 fine crusher with capacity of 250TPH will be supplied to be used to crush cement clinker.

DSMAC XPCF high-efficient [fine crusher](#) is playing a leading role in China cement industry for its four records at domestic:

- the biggest fine crusher at domestic;
- the largest scale of production of fine crusher;
- the only one has been successfully exported abroad;
- the service life of hammer is improved by 150%, comparing with the common hammer.

Media Report

DSMAC crusher hammer is casted by the Tungsten Titanium alloy in the high-manganese steel substrate, which may resist the severe grinding abrasion. DSMAC hammer has been proved to be nonmagnetic by strictly austenite detection, and its service life has been enhanced by 50% compared to the ordinary high-manganese steel.

For DSMAC, the long-term cooperation with Lafarge Group is essential for continued success in the cement industry. "We feel very appreciate to have this opportunity to serve for Lafarge Group." Said Lu Hongbo, Senior Engineering and Owner of DSMAC "We will continue to work hard to maintain our advance technology, expand production capacity and improve the R&D ability."

About DSMAC

DSMAC is the leading China manufacturer and marketer of ores [crushing solution](#), products and services used in mining, metallurgy, chemical industry, construction waste recycling, building materials, coal industry, etc.

DSMAC has a long history of manufacturing quality crushing, feeding and screening equipment, crusher parts and complete sandstone production line. The Company's principal products are jaw crusher, impact crusher, cone crusher, hammer crusher, complete stone production line and wear parts. DSMAC is ISO9001:2008 certified, and more than 1000 sets, 15,000 tons wear parts per year has been successfully exported to Malaysia, Turkey, Mongolia, Vietnam, Cameroon, France, Germany, the Middle East and Africa, totally 100 countries and regions.
