

## Xenadrine Review Details Latest Version of Fat Burning Supplement

Xenadrine Review: how is the latest version of Xenadrine different? AloeVera.com has all the details about this popular supplement.

Xenadrine RZR-X is the latest version of a popular diet supplement and the latest review to hit the web has all the details about how this product works to burn fat and slim users down fast.

Xenadrine first hit the market a few years back and gained a dedicated following of dieters who dropped weight fast with help from the proprietary formula. Today, that formula has been updated yet again and users are saying Xenadrine RZR-X is the best version yet.

"This product includes a lot of natural ingredients to help people slim down," said AloeVera editor Ben Danson. "Once we learned about the science behind this new version of Xenadrine, we had to dig a little deeper and write this review."

During a double blind randomized study, researchers discovered the key active ingredients of Xenadrine RZR-X helped test subjects lose an average of 11.24 pounds in 45 days. Subjects given a placebo lost only 0.66 pounds during the same period of time.

The makers of Xenadrine RZR-X are celebrating the unveiling of the newest version by offering customers a free one-month supply when they purchase the first two months, while supplies last.

"The customer response to this product has been very impressive," Danson said. "While researching this review, we found photos and testimonials featuring several people who dropped as many as 65 pounds in 26 weeks or less. It isn't very often you find a natural product with that kind of fat-burning power."

Xenadrine RZR-X is made using Yerba mate, Guarana and Damiana - three natural ingredients that form a powerful weight loss supplement when combined. The formula is designed to increase metabolism and keep hunger at bay. The powerful, natural fat burning formula is gaining a new group of dedicated dieters.
