Cloud^n

Are You Partnered with the Right Provider to Make Money in the Coming Cloud Wave?

Revenue for Cloud Services is expected to grow 150% by 2013.* Don't miss your chance to profit from this expanding service opportunity. It's easy to get customers into the cloud and start earning revenue fast with Verio's Cloud^n.

✓ **Minimize Risks and Startup Costs**
Skip the hassle of building everything in-house or keeping a bank of servers on stand-by. With Cloud^n you can quickly turn virtual machines up and down on-demand or create a cloud experience of business tools and services and replicate it in minutes.

✓ **Streamline Time to Market to Get Up and Selling Faster**
We deliver the tools, packages and guidance to ensure your success and make it easy to grow revenue with our ready-to-go infrastructure. Load custom applications, software licenses, SaaS or your own bundled packages of business solutions to the flexible Cloud^n environment.
✓ **Reduce Staff and Overhead Costs**
As a viaVerio partner, you get a sales and marketing team committed to advancing your business and our Tier 2 technical experts are available 24 hours a day to help you every step of the way. So you don't need a huge staff to support your success.

✓ **Achieve Greater Profits by Leveraging Our Incredible Margins**
Partners in our viaVerio program earn great margins on our complete lineup of solutions including Cloud^n, Windows, hosted Linux and cPanel VPS and MPS servers, SaaS applications like Hosted Zimbra Email and Collaboration and Hosted Exchange and more - up to 45% off SRP.

✓ **Never Worry About Your Infrastructure**
Verio's Cloud^n is a reliable, high-performance platform delivered from our state-of-the-art data centers and backed by our 99.99% uptime guarantee. This robust solution also includes direct access to NTT Communications' powerful, global IP network.

Why You Need Cloud^n

When you choose a partner, it's critical to opt for a company that will protect your reputation. Verio understands it's your business on the line if the technology doesn't come through. We help protect your reputation with a proven track record of stability and reliability. Benefits for our Cloud^n partners include:

Easy to Sell

Add value to your current offering by reselling our Cloud^n infrastructure or using it as the foundation for your hosted products and services.

Flexible Ways to Support Your Product Offerings

The robust and efficient Cloud^n infrastructure including NTT Communications global IP network can:

- Simplify moving traditional on-premise services to the Cloud
- Be used to create new bundled packages for a complete business solution
- Eliminate up-front hardware costs

Strong Market Need

Customers and business owners keep hearing the buzz about cloud. Deliver a reliable solution that meets their need for flexible resources with Cloud^n.

Growth Potential

Expand market share, target new market segments and up-sell to current customers with a more flexible platform for service delivery.

Easy Way to Demo your Product Immediately

Turn up solutions quickly to engage clients and achieve ROI faster.

Knowledgeable Support

A select team has been specifically trained and is dedicated to supporting your needs 24x7x365 via our online portal.

† Certain restrictions apply. Please see complete Terms and Conditions for details by visiting http://www.viaverio.com/cloud-hosting

How It Works

- Create multiple virtual machines (servers) that belong to your own respective "Cloud" network.
- Add and remove resources or create a snapshot of a current virtual machine in minutes – directly from an easy-to-use Administration Console.
- Use our catalog of predefined, optimized VM images, or create your own custom images and update or copy them - see changes within minutes.

Features of Cloud^n

- Free inbound and outbound bandwidth†
- Simple, straight-forward, itemized pricing.
- Firewall and load balancer included free!
- Easy-to-use portal providing one place to view and manage all of your virtual machines and server configurations.
- Virtually unlimited computing power that can be used on-demand, and billed by actual usage.
- One fixed global IPv4 address, and the ability to buy more.

Ways to Make Money with Cloud^n

While the sky is the limit, here are some of the most popular solutions that are perfect for a cloud delivery model:

- Transactional and high-traffic websites
- Test and development environments
- Web apps like blogs, CMS, or Web 2.0 websites
- File server or storage
- Messaging, email and collaboration solutions
- Ecommerce solutions (E-tail, Shopping Carts)
- Rich media solutions
- Custom or semi-custom SaaS applications
- Shared or VPS hosting for resale
