

Learn More Study Less Review Details Strategic Learning Program

Learn More Study Less review: Scott Young's top selling learning program is explained in new detail for this review.

Learn More Study Less is a fast-selling program aimed at tossing conventional learning methods and embracing those used by the most powerful minds on the planet.

The program's creator, Scott Young, says nobody is really born gifted - it's the way they learn and absorb information that sets them apart. Learn More Study Less is a course that steals methods from the great thinkers and makes it easy to digest.

"The answer is holistic learning," Young said. "This is the strategy of learning I've taught to tens of thousands of students who have either bought my book or read my many articles."

Young says the biggest mistake in learning is one that is promoted at nearly every public school and university in the country: memorization. He says by taking a holistic approach, members can learn more about how effective learning has nothing to do with memorizing.

The program includes video lessons, a 228-page edition of Learn More Study Less and a 38-page case study manual. The case study explores six learners in-depth to show how Young's program helped them turn around their academic underperformance and reduce study time by as much as 75%.

For the latest version, Learn More Study Less also includes three expert audio interviews featuring interviews with learners who share how they learned foreign languages, mastered their grades and gained a thorough understanding of even the most complex mathematical and scientific formulas.

Learn More Study Less is available in three options to suit any learning style or budget - or new members can get all three versions and enroll in a monthly subscription of Learning on Steroids for a discounted rate. Young says that is the ideal package for those who want to take their learning to the next level and master several areas of study.
