Supera Anesthesia Innovations Announces the OC4000

- The latest offering in the Pureline suite of products compliments the OC6000 and the M6000, making Supera the only company to offer the most complete line of veterinary anesthesia equipment-

Portland, Oregon, July 25, 2012 – Supera Anesthesia Innovations announces the release of the Pureline OC4000 Oxygen Concentrator – rounding out the suite of cost- saving oxygen concentrators for veterinary anesthesia. Supera now provides veterinarians with the widest possible options based on their specific needs.

[Supera Anesthesia Innovations](#), formerly LEI Medical, manufactures and supplies high quality equipment to the veterinary industry and has been in business since 1993.

The OC4000 extracts medical-grade O₂ from the air and delivers it on demand. The machine connects with industry standard oxygen DISS threaded connection and includes a 10' high-pressure green oxygen hose. Weighing only 30lbs, this lightweight concentrator is also mobile and convenient for anyone to use and operate.

The design features a sleek, streamlined styling and is one of the most efficient machines on the market, averaging only \$0.12 a day to operate. Unlike some concentrators being sold to the veterinary market, the OC4000 is built specifically for veterinary use from a company who only makes veterinary products.

“Our unique understanding of the veterinary industry and their specific needs makes our line of concentrators the most reliable, efficient and accommodating to veterinary use,” explains Supera Anesthesia Innovations President Brian Lawson. “We say it’s equivalent to free oxygen, because it’s going to really appeal to people who want something proven to be safe, efficient and hit the right number for their bottom line.”

The OC4000 Highlights:

- Quiet operation at 40 dBA
- Provides up to 5 lpm flow
- Energy efficient; average \$0.12 a day to operate
- Built specifically for veterinary use
- FDA approved, UL tested
- Audible and illuminated safety alerts
- Made in the USA, using state-of-the-art manufacturing
- Industry’s best three-year warranty

All Supera products are 100% American made and ship directly from the Supera warehouse outside of Portland, Oregon. To learn more, please visit www.superavet.com. Product photos available on request.
