

CEREVO

Upgraded 「LiveShell」 Registration

July 13, 2012, New York — Quantum-Wireless.com's partner Cerevo is releasing two important upgrades for the [Cerevo LiveShell](#), a live uploading and streaming tool for HD video sources on YouTube, UStream & LiveStream. Cerevo's upgrades were designed to improve the user experience and enhance the LiveShell's technical capabilities. This press release presents the LiveShell's new firmware Rev. 3233 and the upgrade made to the Cerevo 'Dashboard', the web based device management remote control app.

I. Easy User Registration: Users can directly register to other streaming services in addition to Ustream such as YouTube, LiveStream, Nico Nico and etc. In the past, users were first required to get Ustream User ID, which is not a requirement anymore for other streaming service registrations.

II. Wi-Fi Wide Range: In addition to the standard Wi-Fi dongle accessory, provided in the package, the LiveShell now supports other long range Wi-Fi dongles. This allows users to enjoy an increased Wi-Fi range & a wider area of stable video streaming upload.

III. Audio Peak Meter: the new Audio Peak Meter allows users to get real time information on the audio input status and quality from the LiveShell unit. Refer to the LiveShell online manual for more details.

【The LiveShell at a Glance】

- \$289.99 (sales tax and shipping cost not included)
- Available now on Quantum-Wireless.com

The LiveShell is a video broadcasting device compatible with both wireless and non wireless LAN environments that allows users to stream audio and video to live broadcasting services without requiring a computer. Advanced live video broadcasting over the Internet has always presented challenges, such as hauling a bulky computer around, dealing with unstable operations and navigating byzantine settings. With the LiveShell however video broadcasting of any live event can be done with utter simplicity, using a single compact device. A unique 'Dashboard' App & webpage is provided to manage the settings and controls of your high-quality stream and HD camcorder. By using the Dashboard with the LiveShell, users can perform all operations remotely from a smartphone or tablet even when they are on the go.

【Quantum's Usage Recommendation】

The LiveShell is the perfect streaming and video broadcasting companion for on-site events and rapidly changing environments. "We believe the LiveShell is an amazing tool for all video amateurs, and professionals, as it provides a unique service. We share our customers' opinion that the LiveShell is one of a kind and we are proud to be Cerevo's distribution partner for the US market" said Jonathan Goldman, Quantum's vice president. Examples of our customers show the versatility and usage of the Cerevo LiveShell; it has been used to broadcast:

- Live concerts and on-scene performances by artists and comedians in all types of venues
- Journalist stories, guest interviews and press conferences, live from the scene
- NGO & NPO reports and communications at a low cost from crisis areas all around the world
- Extreme sport events and world record attempts—see our coverage of Willie's Ultimate Quest: reaching the top of Mount Kilimanjaro in less than a day, show your support on Facebook ([@WilliesUltimateQuest](#))
- and many other applications requiring a low cost but high quality and reliable solution for live streaming of video content.

Upgraded 「LiveShell」 Registration
