Statin Drugs have been a bonanza for the pharmaceutical industry. Trained to trust and obey pharmaceutical companies and their drug reps, most medical doctors have eagerly poisoned healthy people all over the world with statin drugs.

Hundreds of millions of prescriptions for cholesterol-lowering drugs have been written in the last twenty years. The pharmaceutical drug companies down-play "side effects" "adverse drug reactions" and muzzle whistle-blowers, but a few statin drug victims have found this website [Ask a Patient](#) and recorded their experiences:

Patients recall their experience with Statins:

Advicor® (niacin extended-release/lovastatin) by Pfizer

Crestor® (Rosuvastatin) by AstraZeneca

Lipitor® (atorvastatin) by Pfizer

Livalo® (pitavastatin) Kowa Pharmaceutical, Japan

<http://www.askapatient.com/viewrating.asp?drug=22363&name=LIVALO>

Mevacor® (lovastatin) by Merck

<http://www.askapatient.com/viewrating.asp?drug=19643&name=MEVACOR>

Pravachol® (pravastatin) Sankyo and Bristol-Meyers Squibb

<http://www.askapatient.com/viewrating.asp?drug=19898&name=PRAVACHOL>

Zocor® (simvastatin) by Merck

While you are at the [Ask a Patient website](#), why not look up some of the other drugs the pharmaceutical companies sell? Statin Drugs are not unique and the pharmaceutical industry is not in business to help you to achieve good health. Believe it or not.
