

# Get deals done.

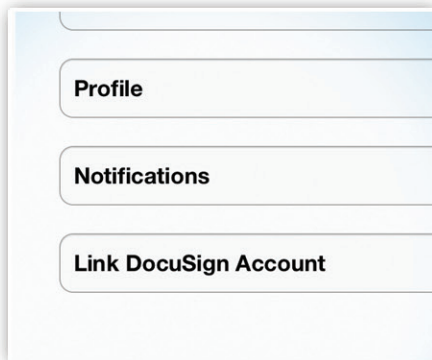

## With Cartavi for iPad, the mobile solution for paperless transactions.

Featuring eSignatures powered by

**DocuSign**

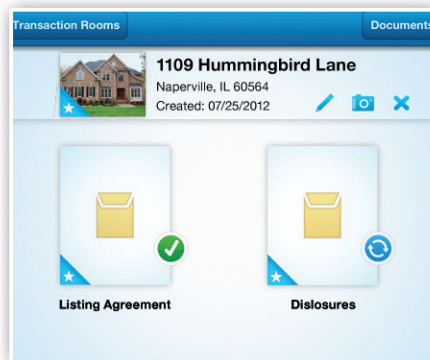

Now you can use your iPad for every step of your transaction. From storing, managing, editing and sharing your documents in the cloud to signing them electronically through DocuSign\*, the global standard for electronic signature.

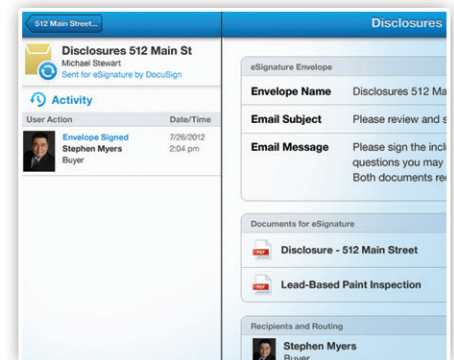

### Use your existing DocuSign login

If you are already a DocuSign subscriber, all you have to do is provide your DocuSign credentials one time to take advantage of Cartavi's secure eSignature capability. The seamless integration between Cartavi and DocuSign makes managing eSignatures quick and easy.

### Create eSignature envelopes for any of your transactions from your iPad

Create an eSignature envelope from within any Transaction Room, and then send it to any participant within the room to be signed. Manage the envelopes you create and the ones in which you are participating simultaneously. You can quickly check the status of any envelope by selecting it from the list.

### Track your envelopes in real-time

Keep track of your document's signature status from within the Transaction Room or your dashboard when you log in to Cartavi using a web browser. Receive real-time notifications via email, on your iPad or your iPhone when activity takes place on an eSignature envelope such as when each part has eSigned.

## Start eSigning today.

Visit [cartavi.com](http://cartavi.com) and sign up for a Basic or Premium plan to begin using Cartavi for eSignatures. Download the free app today in the App Store and visit [cartavi.com/iPad](http://cartavi.com/iPad) to learn more about all the great features.

\* You must have a DocuSign subscription to use Cartavi for electronic signatures.
