NECC Launches New Website at NECC-Controls.com Featuring Quick Part Number Search

National Energy Control Corporation (NECC), a leading distributor of control systems and components for commercial HVAC and lighting systems announces the launch of a dynamic, interactive web site. The new site at <http://necc-controls.com> boasts many new user-friendly features, including a robust **quick part number search** feature to help customers easily locate replacement parts.

Havertown, PA, July 31, 2012 - National Energy Control Corporation, a leading authorized distributor of control systems and components for commercial HVAC and lighting systems, announces the launch of a new website at <http://necc-controls.com>. The new site provides a “**Quick Part Number Search**” feature for those who know the part number they are looking for. Partial part number searches may also be performed. This new feature helps customers find the part they need quickly and easily, with fast ordering and speedy delivery. NECC carries the most complete assortment of [control valves for commercial and industrial applications](#).

Also on the website are new product category pages to assist visitors who are unsure of what they need to find the exact part they are looking for. The category pages enable access to hundreds of easy-to-use selection charts that are designed to help the user find exactly what is needed. By clicking on the part number in the selection chart, the customer can view additional product information and easily order the part.

“The new website with its quick part number search is a blend of technological change and our customer suggestions, gathered over NECC’s twelve year internet B-to-B experience,” says NECC CEO Kerk Farrell. “We’ve combined what’s cool with what our customers have asked us for. Our registered users still earn free UPS ground shipping for web site orders of \$300 or more, and can still access customized pricing.

In addition to the primary product information, the site serves up cross reference and accessory information for many of the listed products, as well as obsolete parts. The cross-reference and accessory information is added to, each day. Farrell says, “Work on the web site will be a continual improvement process, insuring that it contains everything our customers want and need. We can never assume that we’ve presented enough information for our customers.” With links to more than fifty manufacturers’ websites, <http://necc-controls.com> is sure to have a positive impact on customer experience and ease of use.
