

**P.L.A.Y. Fact Sheet**

At P.L.A.Y., we don't just create pet beds that look great. We take a holistic approach and create beds that are great for your pet, you *and* the planet.

**Better for your pet:** we use **100% cotton coverings or furniture-grade fabrics** to totally pamper your pet. These soft, breathable and allergy-free materials will feel amazing to your pet. **Zippered coverings** can also be easily removed for washing. Each of our beds is filled with the **optimum amount of stuffing** to comfortably support your pet. Finally, we believe pet beds should be manufactured to **the highest quality standards**. Therefore, all of our beds are made in a facility that meets the strict quality standards for manufacturing infant and children products. We're talking baby-safe.

**Better for you:** every design is exclusively created by **local artists** in San Francisco, New York and Los Angeles for P.L.A.Y. Our beds are **stylish, creative and P.L.A.Y.ful** --- fluffy and comfortable works of art that complement any home. Each bed is also designed to suit today's modern customer on the go. Our covers are **easily removed** and **100% machine washable**.

**Better for the planet:** Planet Fill™ fillers in our pet beds are made of certified-safe, **100% post-consumer recycled products**. Planet Fill™ is our own trademarked filler created from cleaned and recycled plastic bottles. In addition, our product tags use materials that are **certified-safe by the Forest Stewardship Council (FSC)**, the only forest certification system that is supported by all major environmental groups.

To illustrate the impact we are making, the table below shows how many recycled bottles go into our beds.

Product	Size	Bottles Saved
