CPR
Computer Product Restoration™

DTx's Computer Product Restoration™ (CPR) Program breathes new life into out-of-warranty computer products. Our expert technicians revive systems formerly rendered inoperable or requiring upgrade. DTx has over 20 years experience supporting customers around the world, both on-site and at our ISO registered facility. Contact DTx to learn more.

CPR Program Overview:

- Services include repair, refurbishment or upgrades.

- Eligible systems may be produced by any manufacturer.

- Refurbished systems are restored to like-new condition.

- Comprehensive failure analysis and reporting.

- Customized functional test and burn-in procedures.

- Complete device history record is maintained in DTx's proprietary Manufacturing Execution System.

- Repairs or upgrades can be performed on-site or at DTx's CPR facility.

- Compliant with environmental initiatives like WEEE Directive.

- Centralized, 24/7/365 phone & email support available.

- Optional advanced replacement programs.

- Global storage capabilities.

CPR Program Benefits:

- Extends Product Life

- 100% Product Traceability

- Increase Revenue

- Maximizes ROI

- Reduces Cost

- Promotes Green Initiatives

- Extends Time for Validation and New Product Launch
