**\*SPECIAL LIMITED-TIME OFFER! FREE PHONE WITH ACTIVATION!**

**AMAZING NEW GPS SAFETY CELLULAR PHONE + FALL DETECTOR!**

So easy to use, pressing just one button can quickly and easily call family, friends, neighbors or even a friendly personal Care Specialist who will answer your call by name. Our business office and 24/7 nationwide personal assistance center is proudly located right here in the United States.

**THE GPS SAFETY CELLULAR PHONE IS EASY TO USE**

1. Power Connection
2. Power Button
3. Display
4. Call Button
5. Speed Dial
6. Speaker
7. Volume Adjust
8. End Call Button
9. Call Center Button
10. Microphone

This small (the size of a business card), lightweight and easy to use GPS Safety Cellular Phone is packed with safety and security features not found on any other cellular device in the United States.

Stay connected to family and friends with no phone numbers to remember. You maintain your personal phone book of up to twenty contacts who you can call at any time. Simply press one of the four pre-programmed speed dial numbers on the front to be directly connected to anyone you choose.

Give your cell phone number out to anyone to enjoy convenient cellular service without a complicated cell phone device or features you will never use.

#### **NON-EMERGENCY PERSONAL ASSISTANCE**

If you need immediate personal assistance, simply press the center CARE button to be immediately routed to our US-based 24/7 personal assistance CareCenter where a friendly Personal Care Specialist is standing by to assist.

Your CareCenter Specialist can help you place phone calls, assist with driving directions, provide location information of local banks, gas stations, restaurants and even medical facilities anywhere in the United States.

#### **POLICE, FIRE & EMERGENCY MEDICAL DISPATCH**

When you press your CARE button, your Personal CareCenter Specialist knows who is calling and we will answer your call by name. At the same moment, your complete personal information displays for your Care Specialist.

Based upon the information you voluntarily provide to us, we set-up and maintain a database of information including detailed personal information, a phone book of your family and friends, your doctor or medical facility of choice even a brief medical history, existing medical conditions and/or critical medications so that we can advise emergency services of any special needs or conditions you may have. That information can save emergency personnel valuable time when every second counts.

If you ever should require emergency assistance, press the center "CARE" button. Your Personal Care Specialist is also a professional emergency dispatcher who is able to contact and dispatch the nearest EMS/Paramedics, police, fire or roadside assistance services to assist you as necessary.

#### **BUILT-IN GPS LOCATION SERVICES DATABASE**

Unlike all of the home-based medical alarm systems available today, the GPS Safety Cellular Phone works anywhere in the United States where cellular and GPS signals are available.

In the case of an actual emergency, your Personal Care Specialist uses our proprietary nationwide GPS-based emergency responder database to quickly locate and send local emergency services or roadside assistance to your precise location.

Whether in your home or on the go, now you have the freedom and independence you deserve. No matter where you are or when you need help, our GPS and cellular locating service ensures that you are always connected, protected, and easily located.

#### **FAMILY CAN LOCATE OTHER MEMBERS IF LOST**

Pre-approved family members can contact our call center if they need to locate a user. We will attempt to provide specific GPS coordinates to help find Alzheimer's patients, dementia sufferers, young children, high school/college students on campus and even male or female professionals working alone.

#### **ENJOY ONSTAR TYPE SERVICES IN ANY VEHICLE**

You don't have to spend \$25,000-\$50,000 on a OnStar equipped vehicle to enjoy many of the same safety and security benefits. Simply keep a GPS Safety Cellular Phone with you in the glove box or console of your vehicle to never be without roadside assistance or emergency services.

Keep it turned off until needed, your will remain charged for up to three months and ready to use. Keep a spare battery handy for even greater protection. Perfect for active seniors who still drive but do not want or need a cell phone for everyday use.

#### **BUILT-IN FALL DETECTOR CAN SAVE A LIFE**

A fall, at home or anywhere, can be a serious medical incident especially for the elderly. The GPS Safety Cellular Phone is the first mobile cellular medical alarm device to offer a built-in fall detector.

Upon detection of a possible fall, the GPS Safety Cellular Phone can contact the 24/7 call center to report the incident. Your Personal Care Specialist can then call the phone to confirm if all is OK, call family members to alert them or dispatch EMS to your precise location.
