

NUSPECTIVE ADDS PARESH MISTRY – HEAD OF SYSTEMS ENGINEERING

Pleasanton, Calif. — August 7, 2012 NuSpective Solutions (<http://www.nuspective.com>), a Bay Area leader in virtual datacenter, private/public cloud hybrid and specialty networking solutions, today announces that Paresh Mistry has joined the company as Director of Systems Engineering. In this role, Paresh will be based at the NuSpective Solutions headquarters in Pleasanton, California, and will lead the company's efforts to provide its customers with top tier engineering and subject matter expertise. Paresh's deep engineering skills will be applied to emphasize solutions such as: Private/Public Cloud Hybrids, Enterprise Data Storage & Protection, Disaster Recovery, Intrusion Detection, WAN Optimization and Remote IT Ops/NOC Services. NuSpective Solutions aims to provide its customers a new perspective with integrating business with next generation technologies.

"NuSpective Solutions' strategy of serving Bay Area enterprise customers with smart, efficient data center & networking solutions requires an experienced and versatile engineer who understands the market," said David McMorro, NuSpective Solutions Co-Founder. "With his experience working with mid-large enterprises in the Northern California market, Paresh adds significant engineering depth to our team as we continue to provide excellent value and world-class service for our customers. We are excited to add him to the team."

Prior to joining NuSpective Solutions (<http://www.nuspective.com>), Paresh was a Product Specialist and Systems Engineer at Dell and NetApp respectively; where, over 7 years, he was responsible for providing engineering expertise for clients needing high performance and efficient datacenter solutions. Prior to these roles, Paresh accumulated 12 years of experience managing critical production environments, leading IT teams and advising customers across a range of industries. Paresh holds a B.S. in Computer Science from University of Maryland in College Park, Md.

"I am very pleased to be joining NuSpective Solutions at this important time in the market," said Paresh. "While the team at NuSpective will always be focused on the practical business application of technology, they are also very progressive in their approach to provide customers with cloud-based options that augment their suite of traditional data center infrastructure solutions. I'm really looking forward to helping the NuSpective team and their customers engineer next generation data center infrastructures."

Many Bay Area enterprises are turning to NuSpective Solutions to develop and implement data center-hybrid designs (<http://www.nuspective.com/solutions/data-center-hybrid/>) for their IT and Production environments. NuSpective works with its customers to optimize their traditional infrastructure using hypervisor and shared storage technologies, while helping prepare them to be more extensible to private clouds and public clouds; leveraging new OPEX models where shared infrastructure and personnel make sense. To help enable these strategies NuSpective Solutions partners with some of the industry's top OEM's and Services Providers; such as: VmWare, NetApp, Rackspace, Terremark, SunGard, GoGrid, NetEnrich, Juniper, Cisco, Silver Peak and Palo Alto Networks.

###

About NuSpective Solutions

Headquartered in Pleasanton, California, NuSpective Solutions is a leader in providing virtual datacenter and specialty networking solutions to businesses in Northern California. NuSpective Solutions provides traditional IT and datacenter solutions for many mid-large enterprise customers in the Bay Area market and differentiates with cloud infrastructure knowhow and ability to help customers make their datacenters more extensible to the cloud.

NuSpective Solutions' strengths are focused in the following categories:

- **Cloud Extensibility** – helping customers incrementally design, build and implement a hybrid datacenter strategy by combining assets in their existing capital infrastructure with 3rd party private clouds and public clouds.
- **Storage & Virtualization** – helping customers optimize their storage environment with enterprise class storage solutions and best practices using virtualization; including a wide range of data protection configurations such as combining on-premise and cloud infrastructure for disk-disk backups, replication, disaster recovery and business continuity solutions.
- **Specialty Network Solutions** – helping customers maximize network and application performance across the WAN and providing application aware security solutions that incorporate firewall, web filtering, and intrusion detection/prevention; plus traffic management and load balancing solutions for enterprise applications.
- **Remote IT Ops/NOC Services** – helping customers more efficiently manage the 24x7x365 requirements associated with monitoring, ticket/alarm management and trouble remediation within their Tier 1 & 2 data center operations support model.

NuSpective Solutions headquarters are located at 5870 Stoneridge Mall Road, suite 203, Pleasanton, CA 94588. For more information about NuSpective Solutions, please visit <http://www.nuspective.com> .
