

FOR IMMEDIATE RELEASE:

CYBRIX GROUP JOINS FORCES WITH DNE FOR SPAWAR CONTRACT

Technical expertise and experience combine to support SPAWAR efforts

Tampa, FL, August 6th 2012—Cybrix Group, a cyber-security and technology services firm, announced today that through a new partnership with Dynamic Network Enterprises, Inc., they have been chosen to support the Space and Naval Warfare Systems Center Atlantic (SPAWAR) with network and security services. Cybrix Group was chosen because of their expertise in information security and network operations as well as their strong track-record working with USSOCOM, while DNE provides a strong history with the US Navy and expertise in information assurance. Skip Durbin, Cybrix Group's Contracts Management Officer says, "They've seen from our reputation and past performance here at USSOCOM that we are a valuable contributor in the network operations and network security fields." The partnership between Cybrix Group and DNE is sure to be mutually beneficial while SPAWAR gains the support of two great companies working toward a common goal "Supporting the people in the field at home and abroad".

The \$98.7M contract will run for one year initially, with the option of 4 additional year-long extensions. The contract covers support services including: network systems security support; cryptographic products support; systems engineering, architecture, integration and technical support; cyber security; and secure wireless network infrastructure support. Under this contract, the technical support services provided will affect a host of government agencies including, NETWARCOM, Military Health Systems, The Naval Security Group, U.S. Special Operations Command, IRS, Department of State, and Department of Homeland Security. "The overall impact of this project will be to protect the lives of U.S. military personnel by ensuring that the right information is readily available to the right personnel when needed. And as always, Cybrix Group aims to make this process seamless for the end users while providing the highest levels of security throughout the process." states Durbin.
