

A&I Security Services

A&I Security group is a premier service provider of CA security, risk and compliance solutions and is the most enabled team of security experts in the CA partner ecosystem. We are committed to providing cost-effective, highly available, scalable and secure solutions to enterprises. The team has extensive experience and expertise in CA technologies, specifically with Identity Manager, Federation Manager, SiteMinder, Access Control, Privileged User Password Management, Enterprise Log Management, Risk & Compliance Management.

A&I Application Performance Management Services

A&I Solutions' Performance Management and Monitoring team is a premier Direct Managed Partner and service provider of CA Service Assurance and Application Performance Management. Our Network Performance Management tools can help you continuously monitor application delivery across physical, virtual, and cloud environments. Ultimately, our team of experts assures that end-to-end application response times meet or exceed SLA's and business requirements. A&I Solutions has extensive experience in APM Introscope, CEM, DB Insight, Spectrum, eHealth, Nimsoft and Service Operations Insight.

Clarity Services

Our Project and Portfolio Management Practice is a strong team with expertise in all Clarity modules and capabilities. We can work with you in many ways: providing full end-to-end project management for a Clarity implementation, improving an existing implementation, or by simply providing skilled resources to fill in gaps at key stages in the process. We also offer hosted Clarity solutions to assist in rapid deployments.

Clarity Services Include:

- Strategic Assessment & Roadmap
- Implementation Expertise
- Upgrade & Migration Expertise
- Systems Integration
- Project Planning & Staffing
- Performance Evaluation & Remediation
- Training
- Report & Portlet Development
- Managed Services
