

iSnake

Handheld Push Camera

The iSnake is the ultimate handheld camera specially designed for portable field inspections, with maximum maneuverability. This is a great tool for inspecting pipes/sewers/drains/ducts/HVAC lines 1.2" or larger.

Save yourself time, money and inconvenience with the iSnake videoscope, which can easily be operated by one person, using all of the features and functions.

Set up takes seconds, and the iSnake can be used in even the tightest spaces to perform inspections in real time, capturing images or video for documentation.

Thanks to a new CCD camera chip which features 1,300,000 pixel resolution, and faster processing, you get crisp and detailed image on the integrated 3.5" color monitor.

The waterproof (IP68) camera head is placed on a semi-flexible specially coiled 105mm neck to overcome difficult curved areas inside pipelines, and if the camera head is damaged, it is removable so you don't have to replace the entire unit.

Files are captured to an SD memory card (included), and captured images and video can be downloaded directly to a computer or laptop via a USB cable. There is also a video output jack to transfer the live image to a larger TV monitor, allowing you to discuss repairs or troubleshoot with customers on the spot.

- 20 meter (65 feet)/ 40 meter (131 feet) Working Length
- 1" diameter detachable camera head
- 105mm flexible neck to easily navigate through curves/joints
- Scratch resistant Sapphire lens over the camera
