► Training & Learning Support

We offer a variety of public classes at two convenient locations in Southern California. Our Technical Team is ranked in the top three (3) in the nation by Autodesk. We also offer on-site technical training that can be custom designed to your team's exact educational needs. Educational investment will increase your team's quality of work and your department's overall value. The purchase of any software with subscription entitles you to technical and learning support at no additional charge as you work with the software. This means if you run into technical issues with the software or just have a quick question, you can fill out our Support Ticket on-line and we will contact you within four hours of initial contact*. We will support you via phone, email, or GoToWebinar. You can learn more about our Technical Training Instructors and follow their company blogs at http://www.kelarpacific.com/technical_instructors

*Based on regular business days and hours. Monday through Friday 8am – 5pm

► Project Management

There are several options for managing projects in the AEC field. We have found that Prolog Solutions by Meridian to be the most robust for the construction industry. With three options for deployment—desktop, over the web, and mobile—you can easily communicate between locations in the field or in the office. Prolog can be custom built to fit your specific operation including reporting and scheduling. Our Project Management Specialist and Training Consultant will work with you to create the best proposal to fit your team's budget and requirements.
