

As a small to medium business, you know how important it is to maximize your profitability wherever possible. Streamlining your business needs and making processes more efficient are critical to boosting that bottom line. But how can we apply this to the IT Department? The answer: Cloud Hosting.

What is Cloud Hosting?

Cloud Hosting is changing the way modern businesses operate. The concept is simple: deliver shared computer resources, software, and information to users on demand via the Internet. In other words, get ready to repurpose that back room.

Why Aspire?

The Aspire Cloud Hosting service allows businesses to reduce or eliminate on-premise technology such as servers, data storage, and backup equipment. Instead of housing bulky and expensive technology, clients can transition their software applications and data to our enterprise-class computer infrastructure accessed securely via the Internet. Letting CoNetrix manage and maintain your technology leaves you free to manage your business.

Redundancy

- Server Hardware with virtual infrastructure
- Core infrastructure
- Firewall
- Internet connections

Security

- Intrusion Prevention System (IPS)
- Antivirus protection of all servers
- Web content filtering

Continuity

- Isolated environments for each client
- Fully managed backup and recovery
- Offsite recovery facility

Management

- Servers monitored during business hours
- After-hours support available
- Servers updated with the latest security patches

Assurance

- External perimeter tests conducted regularly
- Internal audits conducted regularly by certified IT auditors (CISA, CISSP)

Optional Exchange Email Hosting

Aspire offers email hosting through Microsoft Exchange in a multi-tenant configuration where each customer's data and email addresses remain private. With the multi-tenant Exchange offering, CoNetrix provides a feature rich Exchange and Outlook environment at a fixed per-user cost that includes all server configuration and maintenance.

Benefits include:

- ➔ Upgrades to the current Exchange version
- ➔ Complete features of Microsoft Outlook, which include calendar sharing and integration with Microsoft Office
- ➔ Full-featured spam and malware filtering
- ➔ Password synchronization with customer's hosted domain
- ➔ Access to email from Outlook Web Access or ActiveSync enabled mobile devices

Optional Disaster Recovery Hosting

Many small-to-medium-sized businesses have applications critical to their operations. Losing access to these applications and data, even for a few hours, can have a huge impact on customer service and profitability. Acquiring backup hardware and software to be ready in the event of a disaster can come at a very high price.

Aspire can host your backup hardware and software for a fixed monthly cost. Our experts can design a Disaster Recovery environment to meet any business need.

Partnership

CoNetrix has partnered with best of breed technology providers to bring you an enterprise-class system, maintained by professionals who are experts in their fields. Our staff holds more than 300 years of accumulated information technology network and security experience. Let's build an IT Strategic partnership to increase your ROI.
