

Microsoft Excel Templates Selection Just Expanded at ExcelTemplates.net

Microsoft Excel templates are an important organizational tool for business and personal use and ExcelTemplates.net is expanding its entire selection of downloadable templates.

Free Excel templates are getting harder to come by, but one website is actually expanding its selection of spreadsheet templates for professional and at-home use.

Excel is crucial to many people and businesses. In fact, roughly 90 percent of businesses in the United States use Excel spreadsheets to track and calculate vital data and statistics. While many Excel experts spend years learning all the intricacies of the program, the right templates can have anyone off and running a lot sooner.

"We all have a need for specialized custom spreadsheets for a number of reasons," said an ExcelTemplates.net spokesperson. "Unfortunately, we don't all have the time to devote the endless hours needed to really learn the nuts and bolts of Excel. Even so-called Excel wizards need templates every once in a while, just to keep production moving along."

At ExcelTemplates.net, visitors have access to a variety of useful templates, from financial reports to sports brackets and household budgets, to name just a few. There are spreadsheets available to compliment any lifestyle, career or hobby.

"Some of our most popular home-budgeting spreadsheets include a credit card payoff calculator as well as an investment strategy spreadsheet," said ExcelTemplates.net. "For small businesses, we offer great templates for balance sheets, break even point and even business plans for entrepreneurs. And they are all available to download instantly."

Microsoft Excel is the most popular spreadsheet program in the world and since it's introduction in 1985, has advanced to incorporate countless features and intricacies designed to organize and calculate even the most complex equations.

Now, people with limited knowledge of the program can still take advantage of thousands of Excel functions easily thanks to the growing number of free Excel templates available.
