FOR IMMEDIATE RELEASE

## **Acquisition of CAI Networks' WebMux and DNSMux Load Balancers**

*AVANU Acquires WebMux and DNSMux Load Balancers' Intellectual Property, Development, Manufacturing, and Support Services*

San Jose, CA – August 22, 2012 – AVANU® today announces the acquisition of CAI Networks' WebMux™ and DNSMux™ load balancers, also known as application delivery controller appliance products. The acquisition includes the entire intellectual property, development, manufacturing and support services of CAI Networks for these products. Key CAI Networks personnel have also joined AVANU and the brand names of WebMux and DNSMux will be retained.

AVANU will improve on the excellent design, software engineering, integration and manufacturing foundation built by CAI Networks. AVANU is refining plans to extend the very high performance capabilities already in the product to even higher levels. The chassis design will be updated for ever-increasing performance. The interface will evolve to address approaches to abstraction of new applications and newer protocols. The firmware updates will emphasize higher performance, higher security, additional standards-compliance, as well as offer additional capabilities to the load balancing foundation. Ancillary tools will provide customers and prospect with simpler answers to optimal configurations and model choices. AVANU will continue to uphold the company's guiding philosophy of being responsive to customers and partners in providing innovative solutions to challenging problems.

"Over 15 years of design and development are in our load balancers and with AVANU's market expertise, AVANU is the perfect company to carry-forth the product line and for making sure the customers are well taken care of", says Wayne Yu, President of CAI Networks.

"As we move forward, it is of utmost importance there are no interruptions to the services and support for existing and new customers alike. The demand for the WebMux load balancers continues to grow and we are very excited about the future enhancement possibilities that we have planned for the products and services. AVANU's goal is to keep up the high quality, superior feature set, and affordability for our users," says Pamela Sun, President of AVANU.

With this acquisition, AVANU now offers the full product line of WebMux load balancers as their own models ready for worldwide fulfillment.

### **AVANU's WebMux Load Balancers Availability**

WebMux load balancers Suggested Retail Price starts at US\$3,999.00 and comes with a one (1) year product warranty, firmware updates, and technical support.
