

RURAL OUTSOURCING FIRM SATURN SYSTEMS NAMED TO INC. 5000 LIST

Duluth, MN, August 22, 2012 -- Saturn Systems was named to the 2012 Inc. 5000 list of the fastest growing private companies in the U.S. with a 71% growth rate over the last three years. Saturn Systems is a national provider of custom software development and quality assurance services delivered through a Rural Outsourcing business model. Saturn Systems was [ranked number 3030](#) on this year's list and also made the list in 2011 with a rank of 2436 and growth rate of 97%.

Scott Risdal, Saturn Systems Vice President of Business Development noted, "A very capable staff of degreed developers combined with our Rural Outsourcing business model has led to another successful year".

[Rural Outsourcing](#) is an established trend in the software development industry, offering lower cost domestic programming services through company locations in small and mid-size cities. Combined with lower cost, the advantages low staff turnover and a central U.S. location make the Saturn Systems Rural Outsourcing model a viable alternative to offshore services.

"Saturn Systems continues to create jobs and offer exciting and challenging careers for software engineers in a difficult economy. We feel very fortunate to have such continued success", commented CEO Keith Erickson.

About Saturn Systems

[Saturn Systems](#) has provided custom software development services in the areas of enterprise solutions, systems integration and device control since 1990. Based in Duluth, Minnesota, Saturn Systems competes with high cost metro based firms and offshore firms by providing an attractive, lower cost, U.S. based alternative call Rural Outsourcing.
