

35th Anniversary Award

In celebration of Pathways 35th anniversary, we are honoring a physician who epitomizes our values and, over the years, has supported our mission of providing compassionate, family-centered home health and hospice care in the patient's place of residence.

DR. PAULA KUSHLAN

A medical oncologist for 35 years, Dr. Paula Kushlan refers to her career as a passion and privilege. What she loves most is seeing each patient's strong inner spirit surface, whatever the reality of the diagnosis. She embraces the honor of helping people through a difficult and frightening part of their lives, whether it is a curable disease requiring complex therapy, a controllable chronic disease involving ongoing monitoring and therapy, or a life-limiting illness necessitating efforts directed at comfort and support for patient and family. Dr. Kushlan provides cancer care at the Palo Alto Medical Foundation. Dr. Kushlan has two grown sons. She enjoys travelling the world and has journeyed extensively through Asia, Africa and Europe.
