

Free Excel Templates Released by ExcelTemplates.net

Free Excel Templates Released by ExcelTemplates.net to highlight the most popular templates on the market.

Microsoft Excel templates are a crucial component in office and home organization and the latest review by ExcelTemplates.net takes a look at several popular options.

For businesses, there's a huge selection of project management Excel templates to help professionals get focused and keep projects on track. The easy to read color-coded templates make it easy to get projects off the ground and running.

Roughly 90 percent of all businesses use Microsoft Excel to accurately track and calculate crucial company data. While it can easily take years to learn all the ins and outs of the program, templates can cut down the learning curve exponentially.

"If you work in a professional setting, odd are you'll need to come up with customized specialty spreadsheets for a number of reasons," said a spokesperson for ExcelTemplates.net. "Today's professionals don't have the time to spend half a day creating spreadsheets from scratch. Our templates provide a quick solution for that dilemma."

Visitors will also find sales and marketing Microsoft Excel templates to fit a number of industries and initiatives. There are sales chart reports, marketing campaign trackers and ROI calculators to help any sized business ensure sales are accurately tracked and reported to the dime.

"People serious about sales will find a lot to love at ExcelTemplates.com," the spokesperson said. "The templates are custom designed to track campaigns, sales goals and implement strategic planning. This allows people to really put together a big picture marketing campaign and cover all the bases."

ExcelTemplates.net also provides a growing inventory of personal spreadsheets perfect for compiling home budgets, shopping lists and calendars. There are dozens of quality spreadsheets to choose from to help keep the home running as efficiently as a Fortune 500 company.
