# While your teenagers are driving, how do you prevent them from texting?

- ▶ The U.S. Department of Transportation reports that car crashes are the leading cause of death for U.S. teens.
- ▶ In 2009, almost 5,500 people were killed and almost half a million were injured in crashes related to distracted driving.
- ▶ Texting while driving increases the risk of a crash by 23 times.

## “WHAT CAN I DO TO KEEP MY TEEN SAFE?”

MobiLoc is a mobile app that works off the phone's GPS function. Texting is blocked when the vehicle carrying the phone goes over 7 mph for 20 seconds. After an idle or stop period of 20 seconds, the texting application will be allowed to be accessed. During the time the phone is in motion, all texts will continue to be received in the background and will be fully accessible once the phone is stopped.
