Green deal certification
the easy way

What is the Green Deal?

The Green Deal is the Government's flagship initiative to increase the energy efficiency of domestic and non-domestic properties throughout the UK.

The Green Deal

The aim of the Green Deal is to improve the energy efficiency of more than 14 million homes by 2020 which is estimated to create more than 250,000 new jobs.

The Green Deal will allow energy firms to provide domestic and non-domestic customers with a range of property improvements which will increase energy efficiency and reduce heating costs. Green Deal Providers who include the likes of; B&Q, E.ON, and British Gas, will provide robust, quality work to people's homes and businesses, at no upfront capital cost.

The costs incurred by making these improvements, will be recouped through installments on a property owner's energy bill over a number of years. The Green Deal is not an advance payment or personal loan and therefore no obligation moves with the property owner should they move.

The "golden rule" of the Green Deal will ensure that the predicted savings from making the energy improvements must equal or exceed the cost of the installation.

An assessment will be carried out on a homeowner's property, with options of a range of relevant measures presented. Once all the details are confirmed, the installation will then take place and the customer will pay for the measure through their energy bills. For more details on each area of the Green Deal Process, see overleaf 'Areas of the Green Deal'

What measures are covered?

Heating, ventilation and air conditioning

- Condensing boilers
- Heating Controls
- Underfloor Heating
- Gas-fired warm air heating systems
- Flue gas recovery devices

Building Fabric

- Cavity wall insulation
- Loft insulation

- Floor insulation
- External Wall insulation
- Energy efficient glazing and doors

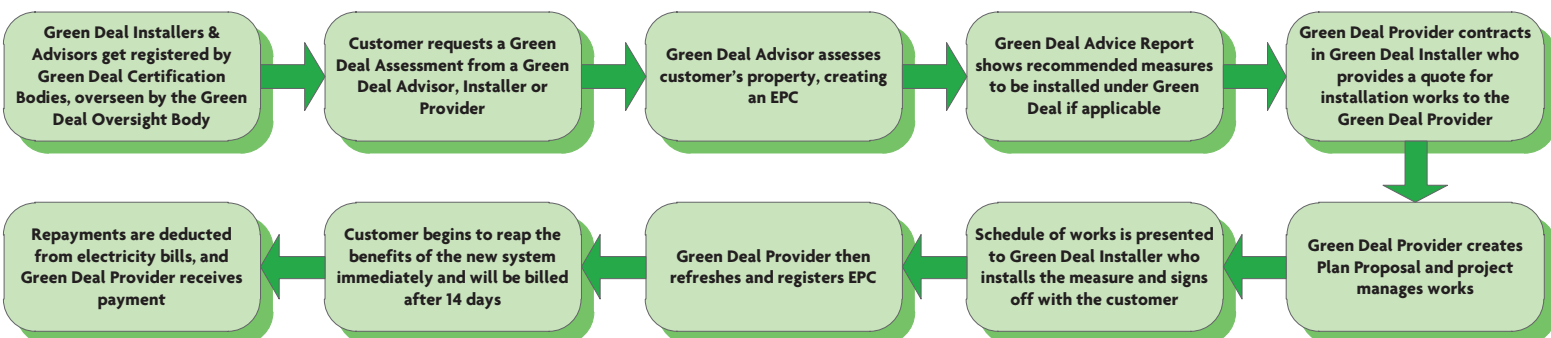

Lighting

- Lighting fittings
- Lighting controls
- Electric storage heaters

Other measures will be available. Please contact us for the most up to date list of approved Green Deal measures.

Microgeneration

- Solar Thermal
- Solar PV
- Ground and Air Source Heat Pumps
- Biomass Boilers
- Micro CHP
- Wind Turbines

Functions of the Green Deal

There are a number of key functions that operate within the Green Deal which are outlined below.

Green Deal Installer

The Green Deal Installer will be an installation company/person who will be suitably trained and competent in the measures to be installed, and is responsible for the physical installation, set to work and, if requested by the Green Deal Provider, the commissioning of the system. The Green Deal Installer must carry out a pre-installation survey on the property to ensure that the Green Deal Provider's specifications can be met, and highlight any issues to the Green Deal Provider prior to the installation commencing. The Green Deal Installer must keep the customer informed of all processes and plans, and collate certain information that will need to be relayed back to the Green Deal Provider for them to review.

Green Deal Provider

The Green Deal Provider is the organisation who will provide the financing for the measures to be installed on the property. They will look to contract in the Green Deal Advisor to provide the Green Deal Assessment, and Green Deal Installer to carry out the installation.

They will design, organise and facilitate the installation to ensure that the installation process runs smoothly from beginning to end. This includes being responsible for all paperwork that is completed both by themselves, the Green Deal Advisor and the Installer.

Green Deal Advisor

The Green Deal Advisor will be a suitably trained and competent energy assessor, who will visit the property, carry out an Energy Assessment and create an Energy Performance Certificate and Green Deal report. On the basis of that information the Advisor will then be able to suggest suitable Green Deal measures to be installed in the property to make it more energy efficient. The Green Deal Provider can then create a proposal to be passed to the Green Deal Installer.

Green Deal Certification Body

The Green Deal Certification Bodies are responsible for carrying out assessments on individual companies to ensure their on-going compliance with PAS2030:2012. The initial assessment will determine whether or not the company in question will be introduced to the Green Deal Register, and if successful will be subject to on-going surveillance visits. They answer directly to the Green Deal Oversight Body and assess companies looking to become Advisors or Installers, against the regulations set by the Green Deal Oversight Body.

Green Deal Oversight

The Green Deal Oversight Body is responsible for enforcing the PAS2030:2012 and for the general running of the Scheme, which includes the Consumer Code. The Green Deal Oversight Body is Gemserv, in conjunction with REAL Assurance, who run the Consumer Code. The Green Deal Oversight Body will liaise with the Green Deal Certification Bodies and are responsible for the whole scheme.

“The Green Deal will be the biggest home improvement plan since the second world war”

Greg Barker MP - Minister of State for Energy & Climate Change

Green Deal Certification Support

www.greendealcertified.com

At Easy Green Deal we offer an Award Winning Support and Mentoring Service to provide a simple solution to becoming a Green Deal Approved Installer or Green Deal Approved Advisor.

At Easy Green Deal we provide a complete Multi Award Winning mentoring package to ensure your company meets all the requirements of the Green Deal. Easy Green Deal provide a full bespoke quality management system containing all required internal and external procedures to ensure compliance.

Upon application to Easy Green Deal, you will be assigned your own designated Green Deal Mentor who will support and guide you from your initial application all the way through to your Green Deal Assessment. Your Green Deal mentor will ensure each element of the Green Deal process is covered, including PAS 2030, the Green Deal code of practice, Green Deal competency criteria and the Green Deal Advisor standard.

We offer bespoke Multi Award Winning Green Deal Packages to;

- New or Existing Installers or Advisors looking to achieve Green Deal Certification

- A suite of other functions

“The support we have received from Easy Green Deal has been fantastic, from day 1 our mentor has supported us in each aspect of our certification and we couldn't be happier with the support we have had.”

Gareth Evans, Managing Director of Olympia Services

Why Does the Green Deal Matter?

Being certified under the Green Deal as either an Installer or Advisor will allow your company to be a part of the “biggest home improvement plan since the second world war”. The Green Deal covers a large range of measures covering a variety of industries opening up the market to large number of installers and advisors.

Green Deal Installer

- For many businesses there is an opportunity to become an authorised Green Deal Installer.
- Only Installers who have been authorised can operate under the Green Deal but they will have access to a huge new market, be able to benefit from the quality and reputation of the Green Deal and work on contracts where they can be sure of payment at the end.
- There is also an opportunity to broaden an installer’s skill base to be able to install multiple measures.
- Firms who offer a whole house retrofit installation service by combining trades have a greater opportunity to expand as they will cover a variety of disciplines.
- The installation of energy efficiency measures will also require the replacement or transfer of pipework, electrics, radiators, etc. meaning an opportunity for plumbers, electricians, joiners, scaffolders and many other trades to benefit from Green Deal retrofit projects.

Green Deal Installer

- All organisations providing Green Deal assessments will be listed on a central register so consumers will be able to check that they have signed up to the Green Deal Code of Practice and are legitimately using the Green Deal quality mark. This will give consumers confidence in the standard of assessment they will receive.
- Opportunity to link up to a Green Deal Installer to offer a complete package to Green Deal Providers.
- Ability to perform Energy Performance Certificates both under the Green Deal and other industries, expanding the scope of what services your company can offer.
- Opportunity to create a positive working relationships with Green Deal Providers, which will create a confidence in your company that will benefit you in the long run
